Biotechnologie (IBG-1)

Development and Characterization of a Microfluidic Magnetic Oscillation Reactor for Enzymes

Daniel Jussen

Schriften des Forschungszentrums Jülich
Reihe Schlüsseltechnologien / Key Technologies

Band / Volume 86

ISSN 1866-1807

ISBN 978-3-89336-974-4

Table of content

Eidesstattliche Erklärung.....	i
Abstract.....	iii
Kurzfassung.....	iv
List of Publications.....	v
Patents.....	v
Conference contributions.....	v
Acknowledgements.....	vi
Table of content.....	viii
List of abbreviations.....	xii
List of units and prefixes.....	xiv
List of symbols.....	xv
List of figures.....	xvii
List of tables.....	xx
1 Introduction.....	1
1.1 Biocatalysis.....	1
1.2 Synthesis of α -Hydroxy ketones.....	3
1.3 ThDP-dependent enzymes.....	5
1.3.1 General reaction mechanism.....	6
1.3.2 Chemo and stereoselectivity of ThDP-dependent enzymes.....	8
1.4 BFD from <i>Pseudomonas putida</i> as model enzyme.....	11
1.5 Biocatalytic process development and multi-parameter optimization.....	12
1.6 Enzyme reactor concepts.....	13
1.6.1 Continuous reactors for enzyme process optimization.....	15
1.7 Microfluidics.....	17
1.8 Microscale flow.....	18
1.9 Computational fluid dynamics.....	19

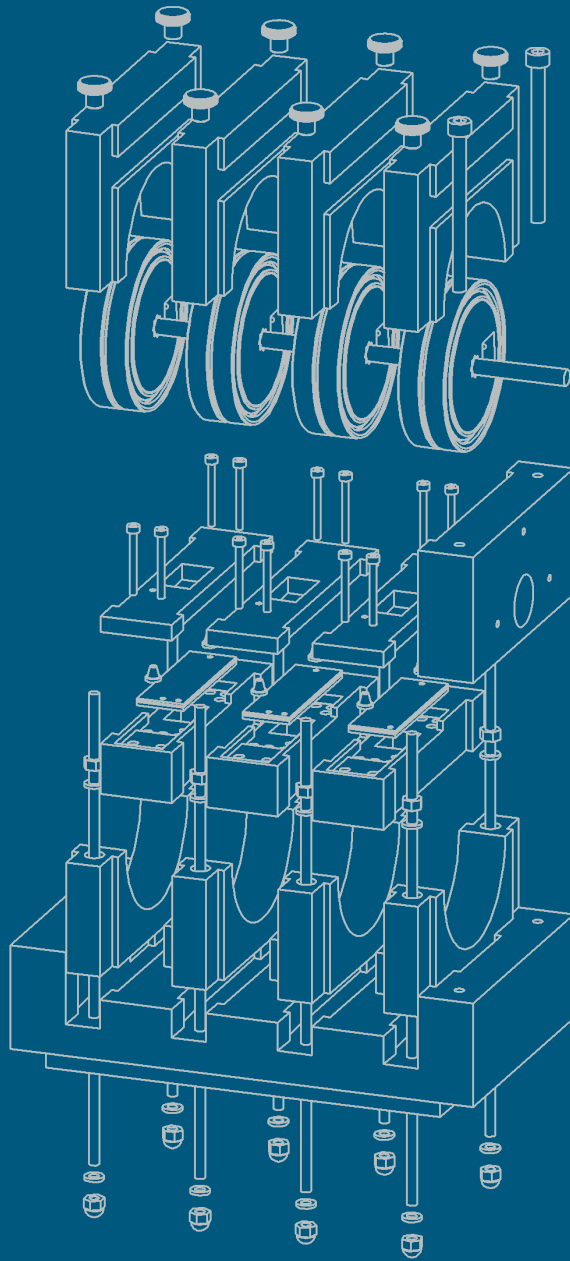

Table of content

1.10	Microscale enzyme reactor concepts.....	20
1.11	Enzyme immobilization	21
1.11.1	Ni-NTA-based immobilization of ThDP-dependent enzymes	22
1.12	Magnetism	24
1.13	Active mixing in microfluidic devices	26
1.14	Charge-coupled device sensor-based dye distribution analysis	27
1.15	Aim of the project.....	28
1.16	Catalogue of demands.....	29
2	Materials and Methods	32
2.1	Software.....	32
2.2	Chemicals	32
2.3	Equipment.....	33
2.4	Magnetic modelling	35
2.5	CFD Simulation.....	36
2.6	Relevant materials properties for construction of the μ MORE	36
2.7	Microfluidic reactor chips.....	36
2.8	Reactor chip connection.....	37
2.9	Dye distribution analysis	41
2.10	Protein determination according to Bradford.....	41
2.11	Cell disruption	42
2.12	Purification of BFD	42
2.13	Decarboxylation assay for BFD.....	43
2.14	Adsorption isotherm measurements for BFD on magnetic beads	45
2.15	BFD immobilization for carboligation.....	46
2.16	Carboligation experiments	46
2.16.1	Substrate solution preparation.....	47
2.16.2	Carboligation activity test of immobilized BFD.....	47

2.16.3	Carboligation activity test of free BFD	48
2.16.4	Continuous carboligation with BFD in the micro scale reactor	48
2.16.5	Bench scale continuous carboligation with BFD.....	49
2.17	HPLC method	50
3	Results & Discussion	51
3.1	Concept for the microfluidic magnetic oscillation reactor for enzymes (μ MORE).....	51
3.1.1	Material properties demands of the μ MORE system	53
3.1.2	Dimensions of the magnetic agitation design	53
3.2	Test of the first μ MORE prototype.....	54
3.3	Microfluidic chip prototyping and characterization.....	55
3.3.1	Validation of dye distribution reactor characterization	56
3.3.2	Dye distribution characterization of chip 1	59
3.3.3	Magnetic modelling of chip 1	61
3.3.4	Development of chip 2.....	65
3.3.5	Magnetic field simulation of chip 2.....	66
3.3.6	Dye distribution characterization of chip 2	67
3.4	μ MORE reaction system	69
3.5	Optimization of the μ MORE prototype.....	72
3.5.1	Optimization of the microreactor chip connection	72
3.6	Magnetic modeling of the threefold reactor block.....	75
3.7	Syringe fine tuning adjuster.....	76
3.8	Enzyme immobilization	77
3.9	Activity of immobilized BFD.....	80
3.10	Carboligation studies in the μ MORE.....	81
3.10.1	pH-optimum of continuous BFD-catalyzed carboligation.....	84
3.10.2	Temperature optimum of continuous BFD-catalyzed carboligation ...	85

Table of content

3.10.3	Optimization of the acetaldehyde concentration.....	89
3.10.4	Optimization of the benzaldehyde concentration.....	90
3.10.5	Optimization of the residence time	93
3.11	Scale up of μ MORE process to a 10 mL bench scale reactor.....	96
4	Summary	100
5	Outlook	102
5.1	Characterization of the enzyme immobilization	102
5.2	Reactor characterization	102
5.3	Reactor chip optimization	103
5.4	Analytics.....	105
6	References	106
7	Appendix.....	118
7.1	Python scripts for image analysis.....	118
7.2	Detailed carboligation reaction data	121
7.3	Construction drawings.....	131
