Plasma Physics IEK-4

Fundamental processes of plasma and reactive gas surface treatment for the recovery of hydrogen isotopes from carbon co-deposits in fusion devices

Sören Möller

Schriften des Forschungszentrums Jülich
Reihe Energie & Umwelt / Energy & Environment

Band / Volume 222

ISSN 1866-1793

ISBN 978-3-89336-977-5

Table of Contents

1	Introduction	7
2	Physical basics and status of knowledge	12
2.1	Fuel retention in co-deposits by plasma-wall interaction.....	12
2.2	Carbon co-deposits.....	13
2.3	Thermo-chemical removal of carbon co-deposits	16
2.4	Physical chemistry of removal by reaction-diffusion processes	18
2.5	Physics of high frequency heated removal plasmas	20
2.5.1	Ion-surface interaction by physical and chemical sputtering	23
2.5.2	Global gas balance studies	25
2.5.3	Effects of geometry	26
3	Experimental arrangements	28
3.1	Multi-purpose vacuum chamber PADOS.....	28
3.2	Toroidal magnetic plasma devices TOMAS and TEXTOR.....	29
3.2.1	Langmuir probe diagnostics	31
3.2.2	Sample arrangement.....	33
3.3	Thin film characterization methods	35
3.3.1	Nuclear reaction analysis and Rutherford backscattering spectrometry	35
3.3.2	Ellipsometry.....	37
4	Modelling results	40
4.1	Description of thermo-chemical removal by reaction-diffusion processes.....	40
4.1.1	Comparison to literature.....	46
4.1.2	Effects of reactive gas dilution by reaction products.....	49
4.1.3	Geometry effects.....	50
4.2	Description of plasma impact removal.....	51
4.2.1	Modelling studies of plasma discharges in magnetic fields.....	51
4.2.2	Plasma sheath implications.....	55
4.2.3	Removal process	57
4.3	Required experimental investigations.....	59
5	Experimental results and comparison with models	60
5.1	Sample preparation	60

5.2	Thermo-chemical removal.....	60
5.2.1	TCR rate proportionality to layer thickness (O ₂)	61
5.2.2	Thermo-chemical removal by NO ₂	62
5.2.3	Impact on magnetic fusion plasma operation	63
5.2.4	Conclusions for thermo-chemical removal	64
5.3	Plasma impact removal	66
5.3.1	ECR plasmas in laboratory device	66
5.3.2	ICWC experiments in tokamak TEXTOR	69
5.3.3	Plasma characterization and radial profiles	73
5.3.4	Conclusions for plasma impact removal	75
6	Conclusions for nuclear fusion application	81
6.1	Influence parameters of thermo-chemical removal	81
6.2	Removal discharge tailoring	82
6.3	Integral approach for co-deposit removal	83
6.4	Extrapolations to future devices	86
7	Summary	89
8	References	94
	Acknowledgment	99
