Agrosphere (IBG-3)

Sorption, Transformation and Transport of Sulfadiazine in a loess and a sandy Soil

Stephan Sittig

Schriften des Forschungszentrums Jülich
Reihe Energie & Umwelt / Energy & Environment

Band / Volume 225

ISSN 1866-1793

ISBN 978-3-89336-982-9

Contents

Contents	i
List of Tables	v
1 Introduction	1
1.1 Rationale	1
1.2 General objectives and outline of the thesis	5
2 Long-term sorption and sequestration dynamics of the antibiotic sulfadiazine - a batch study	7
2.1 Introduction	7
2.2 Materials and methods	10
2.2.1 Laboratory experiments	10
2.2.2 Modeling	14
2.3 Results and discussion	19
2.3.1 Multiple extractions	19
2.3.2 Long-term batch experiments: sterilized soil	21
2.3.3 Long-term batch experiments: untreated soils.	26
2.3.4 Effects of sterilization	27
2.3.5 2SIS description for the multiple extractions	28
2.4 Conclusions	29

3	Dynamics of transformation of the veterinary anti-biotic sulfadiazine in two soils	33
3.1	Introduction	33
3.2	Materials and Methods	36
3.2.1	Chemicals	36
3.2.2	Long-term batch experiments	36
3.2.3	Instrumentation and measurements	38
3.2.4	Mathematical description of dissipation and transformation in the liquid phase	39
3.3	Results and discussion	42
3.3.1	Transformation products of SDZ	42
3.3.2	Transformation in the two soils	44
3.4	Conclusions	50
3.5	Supplementary material	51
3.5.1	Schedule of the laboratory experiments	51
3.5.2	Modeling the bi-phasic behavior of SDZ and deriving additional endpoints	53
3.5.3	Schedule of the simulations	53
3.5.4	Measurements at the end of the 60-day experimental period	53
3.5.5	Correlations between soil properties and sorption and transformation parameters	54
4	Transport of sulfadiazine - laboratory estimated soil parameters strongly determined by the choice of the likelihood function	61
4.1	Introduction	61
4.2	Materials and Methods	65
4.2.1	Unsaturated column experiments	65
4.2.2	Transport model	66
4.2.3	Parameter estimation	67
4.2.4	Application to a field scenario	70
4.3	Results and discussion	73

4.3.1	Simulation of the solute breakthroughs with two different formulations of the likelihood function	73
4.3.2	Field scenario	79
4.4	Conclusions	80
5	Column transport experiments with multiple applications of SDZ in manure and in liquid solution	81
5.1	Introduction	81
5.2	Materials and methods	84
5.2.1	Laboratory experiments	84
5.2.2	Numerical evaluations	85
5.3	Results and discussion	86
5.3.1	Breakthrough curves of the Cl^- tracer . . .	86
5.3.2	Breakthrough curves of the ^{14}C -SDZ equivalent concentrations	88
5.3.3	Concentration profiles	92
5.3.4	Modelling results	93
5.3.5	Breakthrough curves of the transformation products	96
5.4	Conclusions	100
6	Final remarks	101
6.1	Synthesis	101
6.2	Outlook	103
A	Experimental setup of the column experiments	105
	Bibliography	109
