Lecture Notes of the
46th IFF Spring School 2015

Jan Dhont, Gerhard Gompper, Gerd Meier, Dieter Richter,
Gerrit Vliegenthart, Reiner Zorn (Eds.)

Functional Soft Matter

This Spring School was organized
by the Institute for Advanced Simulation,
the Institute of Complex Systems,
the Jülich Centre for Neutron Science and
the Peter Grünberg Institute
of the Forschungszentrum Jülich
on 23 February – 6 March 2015.

In collaboration with
universities, research institutes and industry.

Schriften des Forschungszentrums Jülich
Reihe Schlüsseltechnologien / Key Technologies Band / Volume 94

Contents

Preface

I Introduction: Functional Soft Matter
G. Gompper, J. K. G. Dhont

A Materials

A1 Functional Nanoparticles
A. M. Schmidt

A2 Biomolecules
A. Baumann

A3 Biohybrids
T. Weidner

A4 Functional Polymers at Flat Interfaces
M. Möller

A5 Membrane Proteins & Cellular Signaling
Ch. Fahlke

B Theory

B1 Dynamics of Colloids
J. K. G. Dhont

B2 Simulation Techniques
M. Ripoll, G. A. Vliegenthart

B3 Mesoscale Hydrodynamics
R. G. Winkler

B4 Colloids and their interactions
P. R. Lang, S. De Sio

B5 Formation of Polymer membranes - Turning polymer solution into functional porosity
M. Wessling

B6 Polymerdynamics
D. Richter

C Methods

C1 Scattering
R. Zorn

C2 Light Microscopy
R. Merkel

C3 Single-Molecule Fluorescence Spectroscopy
J. Fitter

C4 Single-Molecule Mechanics and Force Spectroscopy
V. Walhorn, T. Dierks, J. Mattay, N. Sewald, D. Anselmetti

C5 Solid-State NMR
O. Petrov, M. Vogel

C6 Rheology of Complex Fluids
J. Vermant, Th. Schweizer

D Interfaces

D1 Particles at Interfaces and Membranes
T. Auth

D2 Surface Patterning
G. A. Vliegenthart

D3 Nanocomposites
G. J. Schneider

D4 Microemulsions
H. Frielinghaus

E Biomatter

E1 Active and Growing Materials
J. Elgeti

E2 Protein Folding: Kinetics, Pathways, Landscapes
J. Fitter

E3 Protein Dynamics
R. Biehl

E4 Functional Amyloids
M. Carballo-Pacheco, B. Barz, B. Strodel

E5 Protein Structure
O. H. Weiergräber, G. F. Schröder

F External Fields and Active Matter

F1 Structure and Flow
M. P. Lettinga

F2 High Pressure
G. Meier

F3 Charged Colloids and Electric Fields
K. Kang, J. K. G. Dhont

F4 Introduction to thermal gradient related effects
S. Wiegand

F5 Microgels
W. Richtering

F6 Drug delivery in blood
D. A. Fedosov, K. Müller, G. Gompper

F7 Microswimmers
G. Gompper

F8 Mechanical properties of biological protein polymers
G. H. Koenderink

G Future Technologies

G1 Self-Healing Polymers
W. Pyckhout-Hintzen

G2 Membranes for fuel cells and electrolysers
U. Reimer, W. Lehnert

G3 Polyelectrolyte membranes
O. Holderer

G4 Polymer architecture and function
E. van Ruymbeke

G5 Micro- & Nanotechnologies for Neuroscience
A. Offenhaeusser, J. Albers, S. Ullmann
