# Content

<b>Summary.....</b>	<b>1</b>
<b>Zusammenfassung.....</b>	<b>3</b>
<b>1 Introduction.....</b>	<b>5</b>
1.1 <i>Corynebacterium glutamicum</i> , a model organism of biotechnological relevance .....	5
1.2 Small RNAs in bacteria .....	7
1.2.1 Cis-encoded antisense RNAs.....	8
1.2.2 Trans-encoded antisense RNAs.....	10
1.2.3 sRNAs that modulate protein activity.....	12
1.3 The 6C RNA family .....	14
1.4 Aims of this work.....	17
<b>2 Materials and Methods .....</b>	<b>19</b>
2.1 Buffers and antibiotics.....	19
2.2 Culture media.....	21
2.3 Oligonucleotides.....	22
2.4 Bacterial strains and plasmids.....	24
2.5 Plasmid constructions .....	27
2.5.1 Construction of pk19mobsacB derivatives for the deletion of genes .....	27
2.5.2 Construction of pAN and pJC1 derivatives as expression plasmids for <i>C. glutamicum</i> .....	28
2.5.3 Construction of pUCBM21 derivatives as expression plasmids for <i>E. coli</i> .....	28
2.6 Cultivation of bacteria .....	28
2.6.1 Cultivation of <i>E. coli</i> .....	28
2.6.2 Cultivation of <i>C. glutamicum</i> .....	29
2.6.3 Maintenance of bacteria .....	29
2.6.4 Determination of bacterial growth .....	30
2.6.5 Determination of the cell dry weight (CDW) .....	30
2.6.6 Cultivation in microtiter scale in the BioLector system .....	30
2.7 Molecular biology methods .....	31
2.7.1 Isolation of nucleic acid .....	31
2.7.2 Nucleic acid gel electrophoresis .....	32
2.7.3 Determination of nucleic acid concentrations .....	33
2.7.4 Polymerase Chain Reaction (PCR) .....	33
2.7.5 Purification of DNA fragments .....	34
2.7.6 Recombinant DNA techniques .....	34
2.7.7 DNA sequencing .....	35

2.7.8	Generation and transformation of competent <i>E. coli</i> .....	35
2.7.9	Generation and transformation of competent <i>C. glutamicum</i> .....	36
2.7.10	Chromosomal gene replacement using the pK19mobsacB system.....	36
2.7.11	RNA in vitro transcription .....	37
2.7.12	RNA purification by phenol chloroform extraction .....	37
2.7.13	Ethanol precipitation of RNA .....	38
2.7.14	Northern blot analysis .....	38
2.7.15	Quantification of 6C RNA molecules per cell .....	39
2.7.16	RNA-protein interaction studies.....	39
<b>2.8</b>	<b>Global gene expression analysis using DNA microarrays .....</b>	<b>41</b>
2.8.1	Synthesis and labeling of cDNA .....	41
2.8.2	<i>C. glutamicum</i> DNA microarray hybridization.....	42
2.8.3	DNA microarray fluorescence signal measurement and data analysis .....	43
<b>2.9</b>	<b>Protein biochemical methods .....</b>	<b>44</b>
2.9.1	Cell disruption methods .....	44
2.9.2	Determination of protein concentrations.....	44
2.9.3	Protein precipitation .....	45
2.9.4	SDS polyacrylamide gel electrophoresis .....	45
2.9.5	Protein overexpression and purification .....	45
2.9.6	Concentration and desalting of proteins.....	47
2.9.7	DNA–protein interaction studies .....	47
2.9.8	PGK <sub>Cg</sub> enzyme activity assays .....	48
<b>2.10</b>	<b>MALDI ToF mass spectrometry.....</b>	<b>49</b>
<b>2.11</b>	<b>Microscopy techniques.....</b>	<b>50</b>
<b>2.12</b>	<b>Quantification of metabolites .....</b>	<b>50</b>
2.12.1	Quantification of glucose and organic acids in culture supernatants .....	50
2.12.2	Quantification of amino acids .....	51
<b>3</b>	<b>Results .....</b>	<b>53</b>
<b>3.1</b>	<b>The 6C RNA and its expression in <i>C. glutamicum</i>.....</b>	<b>53</b>
3.1.1	The 6C RNA is very stable .....	54
3.1.2	Number of 6C RNA molecules per cell.....	55
3.1.3	Putative transcriptional regulators of the 6C RNA.....	56
<b>3.2</b>	<b>Construction and characterization of 6C RNA deletion mutants .....</b>	<b>60</b>
3.2.1	Transcriptome analysis of the Δ6C mutant.....	62
3.2.2	Screening for a phenotype of the Δ6C RNA mutant.....	67
<b>3.3</b>	<b>Properties of the Δ6CiP mutant in the presence of mitomycin C (MMC).....</b>	<b>69</b>
3.3.1	Growth and cell shape of Δ6CiP mutant cultivated with MMC .....	69
3.3.2	Transcriptome analysis of the Δ6CiP mutant cultivated with MMC .....	71
3.3.3	The SOS response is altered in the Δ6CiP mutant .....	74
3.3.4	Complementation of the Δ6CiP mutant MMC-phenotype.....	76

<b>3.4 Overexpression of the 6C RNA in <i>C. glutamicum</i> pJC1-6C (+/-MMC) .....</b>	<b>78</b>
3.4.1 Growth and cell shape of <i>C. glutamicum</i> pJC1-6C (+/-MMC) .....	78
3.4.2 Transcriptome analysis of <i>C. glutamicum</i> pJC1-6C (+/- MMC) .....	80
<b>3.5 Putative mRNA targets of the 6C RNA .....</b>	<b>87</b>
3.5.1 Deletion and Overexpression of <i>whcD</i> .....	87
3.5.2 Characterization of the downstream genes of the 6C RNA .....	91
<b>3.6 Putative protein interaction partners of the 6C RNA .....</b>	<b>92</b>
<b>3.7 Effect of 6C RNA on amino acid production in <i>C. glutamicum</i> .....</b>	<b>95</b>
<b>4 Discussion .....</b>	<b>99</b>
4.1 The 6C RNA is an abundant and very stable sRNA in <i>C. glutamicum</i> .....	99
4.2 The potential role of the 6C RNA under SOS response-inducing conditions .....	100
4.3 Potential mRNA targets of the 6C RNA .....	105
4.3.1 The downstream genes of the 6C RNA (cg0362 to cg0369) .....	108
4.3.2 The WhcD regulator of <i>C. glutamicum</i> .....	109
4.4 3-phosphoglycerate kinase – a candidate protein interaction partner of the 6C RNA	111
<b>5 References .....</b>	<b>115</b>
<b>6 Appendix .....</b>	<b>127</b>
6.1 Number of 6C RNA molecules per cell .....	127
6.2 Putative transcriptional regulators of the 6C RNA.....	128
6.3 The SOS response is altered in the $\Delta$ 6CIP mutant.....	130
6.4 Characterization of the downstream genes of the 6C RNA .....	132
6.5 Deletion and overexpression of <i>whcD</i> .....	132
6.6 Effect of 6C RNA on amino acid production in <i>C. glutamicum</i> .....	134
6.7 Transcriptome analysis .....	135
