Schriften des Forschungszentrums Jülich
Reihe Energie & Umwelt / Energy & Environment

Band / Volume 238

ISSN 1866-1793

ISBN 978-3-95806-009-8

Table of Contents

List of Figures	1
List of Tables	5
List of Acronyms	7
1 Introduction	9
1.1 Atmospheric background	9
1.2 Airborne time of flight-mass spectrometers	10
1.3 Chemical Ionization	10
1.4 Structure of the Thesis	12
2 Fundamentals of chemical ionization mass spectrometry	15
2.1 Mass spectrometric domains	16
2.2 The time of flight mass analyzer	17
2.3 Mass spectrometer assemblies	19
2.3.1 Chemical ionization at AP	19
2.3.2 Pumping stages	20
2.3.3 Transfer element 3	21
3 Ion bound cluster measurements	25
3.1 Theory	25
3.1.1 Gas expansions	26
3.1.2 Thermal cluster distribution	28
3.1.3 Cluster activation	28
3.2 Experimental	30
3.2.1 Ionization	30
3.2.2 Chemicals	31

3.2.3	Transfer element 1	32
3.2.4	Skimmer/orifice plate setup (Nozzle setup II)	33
3.3	Results	34
3.3.1	Position of the Mach disk	34
3.3.2	Thermal sampling	35
3.3.3	Nucleation processes	38
3.3.4	Labeling experiments	40
3.3.5	Heating by electrical fields	44
3.3.6	Heated capillary	47
3.3.7	Protonation via CID	50
3.3.8	Signal intensity considerations	52
3.3.9	Nozzle setup II	52
4	CIMS inlet and ion source	55
4.1	Theory	55
4.1.1	H ₂ SO ₄ ion chemistry	56
4.1.2	Dopant species	57
4.1.3	Ion source set-up geometry	62
4.1.4	Laminar flow ion source	64
4.1.5	DBD plasma ion source	64
4.1.6	Parameters of pipe flows	68
4.1.7	Ion transfer through a capillary	69
4.2	Experimental	70
4.2.1	Inlet and ion source design	70
4.2.2	Setup of the new DBD ion source	71
4.2.3	Improved DBD setup	73
4.3	Results	74
4.3.1	CIMS inlet	74
4.3.2	Properties of the DBD	75
4.3.3	DBD ion generation	82
5	CIMS transfer stage	85
5.1	Theory of ion transfer elements	85
5.1.1	The RF-only quadrupole	85
5.1.2	The ion funnel	88

5.1.3	Effective ion temperature	90
5.1.4	Breakdown voltage	92
5.2	Experimental	92
5.2.1	The 100 hPa ion funnel (Stage 0)	93
5.2.2	The 5 hPa ion funnel (Stage 1)	95
5.2.3	The segmented Quadrupole (Stage 2)	97
5.2.4	Ion trajectory calculations	98
5.3	Results	100
5.3.1	The 100 hPa ion funnel	100
5.3.2	The 5 hPa ion funnel	103
5.3.3	Characteristics of the segmented quadrupole	111
5.3.4	Space-charge limit of the transfer elements	114
5.3.5	Transmission of the transfer elements	114
5.3.6	Limits of the ion funnel	119
6	Conclusions and Outlook	121
6.1	Outlook	123
A	Details of the HS1 and SDS simulations	143
A.1	Boundary conditions of the fluid dynamic simulations	143
A.2	100 hPa ion funnel	144
A.3	5 hPa ion funnel	146
A.4	5 hPa ion funnel with reduced velocity	147
A.5	Short 5 hPa ion funnel	148
B	Python program listings	153
C	Program code for SDS @ 100 hPa	161
D	Program code for HS1 @ 5 hPa	165
E	Images	169
