# CONTENTS

---

<b>1</b>	<b>Introduction</b>	<b>1</b>
<b>2</b>	<b>Fundamentals &amp; Theory</b>	<b>7</b>
2.1	Magnetophoresis . . . . .	8
2.1.1	Magnetic fields . . . . .	8
2.1.2	Magnetic fields induced by microwire crossbar arrays . . . . .	11
2.1.3	Matter in magnetic fields . . . . .	18
2.1.4	Force on an induced magnetic dipole . . . . .	24
2.2	Dielectrophoresis . . . . .	25
2.2.1	Electric fields . . . . .	26
2.2.2	Matter in electric fields . . . . .	27
2.2.3	Force on an induced electric dipole . . . . .	34
2.3	Resistive heating and heat transfer . . . . .	37
2.3.1	Resistive heating . . . . .	37
2.3.2	Heat transfer . . . . .	39
2.4	High-resolution thermography using fluorescence life-time imaging microscopy . . . . .	41
2.5	Ca <sup>2+</sup> waves in cardiomyocytes . . . . .	43

## CONTENTS

---

2.5.1	Cardiomyocyte excitation-contraction coupling . . . . .	43
2.5.2	Ca <sup>2+</sup> imaging . . . . .	47
<b>3</b>	<b>Material &amp; Methods</b>	<b>51</b>
3.1	Development of a setup for on-chip electromagnetic actuation and thermal stimulation . . . . .	52
3.2	Experimental procedures . . . . .	61
3.2.1	Chip fabrication . . . . .	61
3.2.2	Magnetic particle actuation . . . . .	62
3.2.3	Culture of HL-1 cells on the microwire array chips	68
3.2.4	Thermal lesion . . . . .	70
3.3	Data analysis and simulation . . . . .	72
3.3.1	Tracking of individual magnetic beads . . . . .	72
3.3.2	Ca <sup>2+</sup> propagation analysis . . . . .	74
3.3.3	Analytical simulation of the magnetic fields . . . . .	75
3.3.4	Numerical simulation of the magnetic and electric fields . . . . .	77
3.3.5	Numerical simulation of the temperature distribution at the chip's surface . . . . .	82
<b>4</b>	<b>Results &amp; Discussion</b>	<b>85</b>
4.1	Electromagnetic actuation of magnetic microparticles . . . . .	86
4.1.1	Collection and actuation of clouds of magnetic microparticles . . . . .	86
4.1.2	Actuation and tracking of individual magnetic particles at the chip's surface . . . . .	97
4.1.3	3-dimensional actuation of individual magnetic particles . . . . .	99

---

---

## **CONTENTS**

4.2 Thermal introduction of microscopic lesions into cell networks . . . . .	128
4.2.1 Temperature dependence of $\text{Ca}^{2+}$ waves and single-site lesion in cardiomyocyte cultures . . .	128
4.2.2 Dissection of functional subunits of cellular networks using multi-site lesions . . . . .	141
<b>5 Outlook</b>	<b>151</b>
5.1 Mechanical & chemical stimulation of cells . . . . .	152
5.2 On-chip particle actuation and tracking for bioassays .	155
5.3 On-chip thermal lesion for studies of axotomy and regeneration . . . . .	158
<b>References</b>	<b>161</b>
<b>Author's list of publications</b>	<b>179</b>
<b>Danksagung</b>	<b>181</b>
