Metabolic engineering of *Escherichia coli* for the production of plant phenylpropanoid derived compounds

Philana Veronica van Summeren-Wesenhagen

Schriften des Forschungszentrums Jülich
Reihe Schlüsseltechnologien / Key Technologies

Band / Volume 103

ISSN 1866-1807

ISBN 978-3-95806-039-5

Table of content

1 Summary	1
2 Introduction	3
2.1 Plant natural products.....	3
2.1.1 Isoprenoids.....	4
2.1.2 Alkaloids.....	5
2.1.3 Glucosinolates.....	6
2.1.4 Polyacetylenes.....	7
2.1.5 Phenylpropanoid and phenylpropanoid-derived polyphenols.....	7
2.2 Production of plant natural products.....	10
2.2.1 Plant based production.....	10
2.2.2 Chemical synthesis.....	11
2.2.3 Microbial production.....	12
2.3 Metabolic engineering strategies for microbial PNP strain development....	13
2.4 Tools for synthetic pathway assembly.....	15
2.5 Aims of this thesis.....	17
3 Results	19
3.1 Putting bugs to the blush: metabolic engineering for phenylpropanoid-derived products in microorganisms.....	23
3.2 Metabolic engineering of <i>Escherichia coli</i> for the synthesis of the plant polyphenol pinosylvin.....	31
3.3 Combinatorial optimization of synthetic operons for the microbial production of <i>p</i> -coumaryl alcohol with <i>Escherichia coli</i>	55

4 Discussion	71
4.1 Microbial pinosylvin production with <i>Escherichia coli</i>	72
4.2 Suggestions to further improve microbial synthesis of pinosylvin with <i>E. coli</i>	79
4.3 Combinatorial optimization of synthetic operons for the microbial production of <i>p</i> -coumaryl alcohol with <i>Escherichia coli</i>	80
4.4 Suggestions to balance the heterologous gene expression in microorganisms.....	83
4.5 Conclusions.....	83
5 References	86
6 Appendix	91
6.1 Supplementary material "Metabolic engineering of <i>Escherichia coli</i> for the synthesis of the plant polyphenol pinosylvin"	91
6.2 Supplementary material "Combinatorial optimization of synthetic operons for the microbial production of <i>p</i> -coumaryl alcohol with <i>Escherichia coli</i> "	92
