Contents

Abstract	1
Zusammenfassung	5
1. Introduction	7
2. Fundamentals	11
2.1. Light absorption and emission in solar cells	11
2.1.1. Direct and indirect semiconductors	14
2.1.2. p-n and p-i-n junctions	15
2.1.3. Recombination processes	18
2.2. Applications of the reciprocity theorem	21
2.3. Thin-film solar cells	25
2.3.1. Cu(In,Ga)Se ₂ solar cells	26
2.3.2. <i>a</i> -Si:H solar cells	28
2.4. Electrical characterization of solar cells	29
2.4.1. Current/Voltage characteristics	29
2.4.2. External quantum efficiency	31
3. Experimental methods and setups	35
3.1. Electroluminescence imaging	35
3.2. Luminescence spectroscopy	42
3.3. Lock-in thermography	44
4. Electroluminescence analysis of CIGS solar devices	47
4.1. Introduction	47
4.2. Experimental conditions	51

4.3. Analysis of luminescence spectra	52
4.4. Analysis of transient EL images	61
4.4.1. Determination of the transient junction voltage	61
4.4.2. Quantitative analysis of transient EL images	63
4.5. Summary	70
5. Analysis of shunts with a network simulation method	73
5.1. Introduction	73
5.2. Network simulation method and SPICE	74
5.3. Experimental results	81
5.4. Simulation results	86
5.5. Discussion	96
5.6. Summary	104
6. Phenomenology of defects in Cu(In,Ga)Se₂ solar cells	107
6.1. Introduction	107
6.2. Macro- and microscopic analysis of defects in CIGS solar modules	108
6.2.1. Freckles	110
6.2.2. Smears	115
6.2.3. Doughnuts	116
6.3. Summary	125
7. EL analysis of <i>a</i>-Si:H solar cells and modules	127
7.1. Introduction	127
7.2. Determination of the local junction voltage	128
7.3. Summary	136
8. Conclusions and Outlook	137
A. Effects of shunt position on cross-talk	141
B. List of Publications related to this work	143
C. Curriculum vitae	145
Bibliography	147
