## Contents

Abstract .....	I
Kurzzusammenfassung .....	III
Contents .....	VI
List of Abbreviations .....	IX
List of Tables .....	XI
List of Figures .....	XIII
1 General Introduction .....	1
2 Calibration of a novel low-cost soil water content sensor based on a ring oscillator.....	15
2.1 Objectives .....	16
2.2 Introduction.....	16
2.3 Materials and Methods.....	21
2.3.1 The SPADE sensor .....	21
2.3.2 Reference liquids .....	23
2.3.3 Measurement set-up and sensor output determination.....	24
2.3.4 Sensor-to-sensor variability .....	25
2.3.5 Relating sensor output to dielectric permittivity.....	25
2.3.6 Derivation of the temperature correction function.....	25
2.3.7 Testing of the temperature correction function.....	26
2.4 Results and Discussion .....	29
2.4.1 Sensor-to-sensor variability .....	29

2.4.2 Relating sensor output to dielectric permittivity.....	30
2.4.3 Temperature correction function for sensor output .....	33
2.4.4 Testing the temperature correction function .....	36
2.5 Conclusions.....	38
3 Effects of soil hydraulic properties on the spatial variability of soil water content: evidence from sensor network data and inverse modeling .....	41
3.1 Objectives .....	42
3.2 Introduction.....	42
3.3. Materials and Methods.....	45
3.3.1 Site description.....	45
3.3.2 Soil water content determination .....	46
3.3.3 Temporal stability analysis .....	49
3.3.4 Hydrus-1D simulation.....	51
3.3.5 Estimation of soil hydraulic parameters using inverse modeling .....	53
3.4. Results and discussion .....	55
3.4.1 Time series data of weather conditions and soil water content .....	55
3.4.2 Observed <i>MRD</i> and <i>SDRD</i> .....	57
3.4.3 Evaluation of estimated hydraulic parameters.....	60
3.4.4 Relationships between soil hydraulic properties and <i>MRDs</i> .....	62
3.5. Conclusions.....	65
4 Predicting sub-grid variability of soil water content from basic soil information.....	67

4.1 Objectives .....	68
4.2 Introduction.....	68
4.3 Model development .....	70
4.4 Materials and Methods.....	72
4.4.1 Site descriptions .....	72
4.4.2 Soil hydraulic parameter prediction.....	74
4.5 Results and Discussion .....	75
4.5.1 Sensitivity analysis of soil hydraulic parameters on $\sigma_{\theta}(<\theta>)$ relationship.....	75
4.5.2 Prediction of the $\sigma_{\theta}(<\theta>)$ relationship from soil texture data .....	76
4.5.3 Inverse estimation of hydraulic parameter variability from observed $\sigma_{\theta}(<\theta>)$ data .....	82
4.6 Conclusions.....	84
5 Synthesis .....	85
5.1 Final Conclusions.....	85
5.2 Outlook .....	87
Appendix A.....	89
Appendix B .....	93
Appendix C .....	97
Acknowledgements.....	107
References .....	109
Publications.....	123
