Contents

Zusammenfassung.....	iii
Abstract.....	V
Contents.....	Vii
List of figures.....	x
List of Tables.....	xiii
List of abbreviations.....	xv

I. General introduction.....20

I.1 Theory.....	21
I.2 Rationale.....	22
I.3 State of the art.....	24
I.3.1 Biopurification system and biofilter.....	24
I.3.2 The role of biomixtures in biopurification system.....	25
I.3.3 Biochar and Digestate as novel biomixtures.....	26
I.3.4 Stabilization mechanisms of natural, pyro (biochar) - bio (digestate) - genetic organic matter.....	26
I.3.5 Soil respiration as an indicator of pesticides degradation.....	27
I.3.6 Biochar and Digestate as adsorbents.....	28
I.4 Objectives and outline of the thesis.....	29

II. Microbial respiration of biochar- and digestate- based mixtures..... 32

II.1 Introduction.....	33
II.2 Materials and methods.....	35
II.2.1 Soils and organic amendments.....	35
II.2.2 Preparation of soils with organic amendments.....	36
II.2.3 Measurement of microbial respiration.....	36
II.2.4 Characterization of mixtures (DOC, SUVA ₂₅₄ and pH measurement)...	37
II.2.5 DOC adsorption study.....	40
II.2.6 CO ₂ flux calculation.....	40

II.2.7 Kinetics of the carbon turnover.....	41
II.2.8 Statistical analysis.....	41
II.3Results and discussion.....	44
II.3.1 Cumulative CO ₂ -C releases.....	44
II.3.2 CO ₂ release with respect to C added.....	46
II.3.3 Carbon turnover kinetics.....	48
II.3.4 Characterization of soil, biochar and digestate mixture.....	50
II.3.5 Influence of DOC, SUVA and clay content on CO ₂ evolution.....	51
II.4Conclusions.....	55
III. Dissipation of bentazone, pyrimethanil and boscalid in biochar and digestate based soil mixtures for biopurification systems.....	58
III.1 Introduction.....	59
III.2 Material and methods.....	62
III.2.1 Substrates.....	62
III.2.2 Pesticides.....	62
III.2.3 Characterization of used soil-mixtures.....	63
III.2.4 Mineralization/Dissipation experiments.....	66
III.2.5Analytical procedures.....	69
III.2.6Pesticide mineralization/dissipation kinetics.....	71
III.2.7 Goodness-of-fit statistics.....	71
III.3Results and discussion.....	72
III.3.1 Pesticide mineralization and kinetics.....	72
III.3.2 Pesticide dissipation and kinetics.....	77
III.3.3 Formation of non-extractable pesticide residues.....	78
III.4Summary and conclusion.....	81
IV. Sorption-desorption behavior of three contrasting pesticides in biochar and digestate based soil mixtures for biopurification systems.....	82
IV.1 Introduction.....	83
IV.2 Material and methods.....	85
IV.2.1 Substrates.....	85
IV.2.2 Pesticides.....	86
IV.2.3 Characterization of used soil-bio mixtures.....	86

IV.2.4 Equilibrium adsorption experiments.....	87
IV.2.5 Equilibrium desorption experiments.....	89
IV.2.6 Analytical procedures.....	89
IV.2.7 Equilibrium adsorption-desorption isotherms.....	90
IV.2.8 Statistical analysis.....	91
IV.3 Results and discussion.....	92
IV.3.1 Characterization of Soil, Biochar and Digestate Mixture.....	92
IV.3.2 Determination of suitable soil: solution ratio.....	92
IV.3.3 Equilibrium adsorption isotherms.....	94
IV.3.4 Equilibrium desorption isotherms.....	100
IV.4 Conclusions.....	105
V. Synopsis.....	106
V.1 Extended summary.....	107
V.2 Synthesis.....	109
V.2.1 Responses of the soil biota to biochar and digestate.....	109
V.2.2 Influence of biochar and digestate on fate (dissipation and sorption/desorption) of pesticides used for biopurification setups.....	110
V.3 Outlook.....	111
VI. References.....	113
VII. Appendix.....	131
Appendix A.....	131
Appendix B.....	132
Appendix C.....	133
Acknowledgement.....	134
