# Contents

1	Introduction .....	1
1.1	Motivation and objectives .....	1
1.2	Tropospheric ethane and its oxidation by hydroxyl radicals.....	3
1.3	Chemical Kinetics of $C_2H_6 + OH$ reaction.....	7
1.4	Relative reaction rate approach.....	9
1.5	The kinetic isotope effect (KIE).....	12
1.6	Stable carbon KIE and number of carbon atoms.....	21
1.7	The “Isotopic hydrocarbon clock” .....	23
2	Experimental KIE measurement for $C_2H_6 + OH$ .....	25
2.1	Instrumentation .....	25
2.1.1	Temperature controlled reaction chamber .....	26
2.1.2	Thermal desorption - gas chromatography - isotope ratio mass spectrometry (TD-GC-IRMS) .....	31
2.2	Method and procedure .....	34
2.2.1	Quality control experiments.....	39
2.2.2	KIE experiments.....	42
2.2.3	$\delta^{13}C$ calculation.....	43
2.3	Experimental results and discussion .....	46
2.3.1	Experimental rate coefficient determination for the OH oxidation of ethane by employing the relative rate approach .....	46
2.3.2	Kinetic isotope effect results .....	50

3	Theoretical KIE determination for $C_2H_6 + OH$ .....	56
3.1	Related Theories.....	56
3.1.1	Electronic Structure Calculations.....	57
3.1.2	Reaction Kinetics Calculation.....	70
3.2	Computational Details.....	79
3.2.1	Geometry Optimizations.....	80
3.2.2	Anharmonic Vibrational Frequencies.....	80
3.2.3	Internal rotation.....	81
3.2.4	Energy Barriers.....	81
3.2.5	Thermal rate coefficients and KIE.....	81
3.3	Results and Discussion.....	82
3.3.1	Electronic properties of stationary points.....	82
3.3.2	Calculated thermal rate coefficients and KIE.....	93
4	Implication of using observed KIE for $C_2H_6 + OH$ for ambient stable carbon isotopic ratio interpretation.....	104
4.1	Interpretation of ambient ethane isotopic ratio observations.....	104
4.2	Role of the precision improvement of KIE determination.....	106
4.3	Role of KIE temperature dependence.....	107
5	Conclusions.....	110
	List of Abbreviations.....	114
	List of Figures.....	119
	List of Tables.....	128
	References.....	130

Appendices .....	144
A.1 Examples for chromatograms .....	144
A.1.1 Blank concentration measurement .....	144
A.1.2 Example chromatograms from FID, MSD and IRMS.....	146
A.2 Evaluation of uncertainties.....	149
A.2.1 Relative concentration.....	149
A.2.2 Relative rate approach.....	150
A.2.3 Chemical conversion of the reactants.....	151
A.2.4 Delta values calculation.....	151
A.2.5 KIE calculation .....	152
A.3 Stability of TD-GC-IRMS.....	153
A.4 Results for relative rate experiment .....	154
A.5 Results for KIE experiments.....	165
A.6 Results for electronics calculation .....	177
A.6.1 Coordinates for optimized structure ( $\text{\AA}$ ).....	177
A.6.2 Single-point energies and zero-point energies .....	180
A.6.3 Harmonic vibrational frequencies ( $\text{cm}^{-1}$ ).....	181
A.6.4 X-matrix of anharmonic constants ( $\text{cm}^{-1}$ ) .....	184
