ISBN 978-3-95806-184-2

## Contents

<b>1. Introduction</b>	<b>6</b>
1.1. Thermonuclear fusion . . . . .	6
1.2. Thermal desorption spectroscopy . . . . .	8
1.3. Experimental observations: . . . . .	11
1.3.1. Low fluence regime . . . . .	11
1.3.2. Retention near critical fluence . . . . .	12
1.3.3. Very high fluence-regime . . . . .	15
1.4. Rate equation modelling . . . . .	16
1.5. Aim of this thesis . . . . .	17
<b>2. Hydrogen diffusion in beryllium</b>	<b>18</b>
2.1. Diffusion in solids . . . . .	18
2.2. Beryllium: Atomistic properties . . . . .	19
2.3. Atomistic description of diffusion . . . . .	25
2.4. Monte Carlo model . . . . .	27
2.5. Diffusion with temperature ramp . . . . .	30
2.5.1. Analytical solution . . . . .	30
2.5.2. Comparison to numerical solutions . . . . .	34
2.6. Conclusion . . . . .	36
<b>3. Binding mechanisms of H in defects</b>	<b>37</b>
3.1. Environment of vacancies . . . . .	37
3.2. Vacancy-hydrogen complex . . . . .	38
3.3. From first-principles to rate-equation modelling . . . . .	41
3.3.1. Detrapping: $VH \rightarrow H + V$ . . . . .	42
3.3.2. Trapping: $H + V \rightarrow VH$ . . . . .	42
3.4. Simple CRDS . . . . .	43
3.4.1. Dependence on retention profile . . . . .	46
3.4.2. Dependence on diffusion constant . . . . .	47
3.4.3. Dependence on detrapping properties . . . . .	48
3.4.4. Dependence on (re)trapping properties . . . . .	49
3.4.5. Dependence on heating rate $\alpha$ . . . . .	49
3.4.6. Dependence on fluence $\Phi$ . . . . .	50
3.4.7. Summary of parameter dependencies on TDS . . . . .	51
3.5. Mobile defects . . . . .	52
3.6. Ambiguities in earlier CRDS calculations . . . . .	55
3.7. Multiple trapping . . . . .	57
3.8. Comparison to experimental data for low fluences . . . . .	60
3.9. Conclusion . . . . .	60
<b>4. Surface effects</b>	<b>62</b>
4.1. Desorption from Be(0001)-surface . . . . .	62
4.2. Analytic treatment of second order desorption processes . . . . .	64

4.3. Comparison between low temperature peak and surface desorption . . . . .	67
4.4. Extension of the CRDS model by surface effects . . . . .	71
4.5. Coverage dependant desorption barrier . . . . .	76
4.6. Conclusion . . . . .	78
<b>5. Discussion and summary</b>	<b>79</b>
5.1. TDS features & their possible explanation . . . . .	79
5.2. Suggestions for future experiments . . . . .	84
<b>A. Appendix</b>	<b>85</b>
A.1. Overview of experiments . . . . .	85
A.2. Vineyard's theory of thermally activated processes . . . . .	86
A.3. First order surface desorption . . . . .	89
A.4. Computational details . . . . .	91
<b>B. References</b>	<b>94</b>
<b>C. List of figures</b>	<b>98</b>
<b>D. List of tables</b>	<b>100</b>
