Fundamental Insights into the Radium Uptake into Barite by Atom Probe Tomography and Electron Microscopy

Juliane Weber

Schriften des Forschungszentrums Jülich
Reihe Energie & Umwelt / Energy & Environment

Band / Volume 367

ISSN 1866-1793

ISBN 978-3-95806-220-7

Abbreviations.....	IX
1 Introduction	1
2 Scientific and Theoretical Background	7
2.1 Radium	7
2.2 Properties of RaSO_4	9
2.3 Properties of BaSO_4	9
2.4 Immobilization of Radium by Solid Solution Formation: The $\text{Ba}_x\text{Ra}_{1-x}\text{SO}_4$ Solid Solution	11
2.4.1 Theory of solid solution formation in aqueous solutions	13
2.4.2 The Lippmann theory	15
2.4.3 Experimental work on the $\text{Ba}_x\text{Ra}_{1-x}\text{SO}_4$ solid solution	16
2.5 Replacement by water-mediated dissolution-precipitation	23
2.5.1 Previous experimental work on replacement processes.....	25
2.5.2 Volume changes and porosity evolution during dissolution- precipitation processes	27
2.5.3 Micro- and nanoscopic evidences for a dissolution- precipitation process	28
2.6 High Resolution Methods	29
2.6.1 Transmission Electron Microscopy (TEM).....	30
2.6.2 Atom Probe Tomography (APT)	33
2.6.3 Correlated microscopy: Combination of APT and TEM	36
2.6.4 FIB Tomography	37
3 Aim of this work.....	38
4 Materials and methods	39
4.1 Batch experiments	39
4.1.1 Barite preparation and characterization	39
4.1.2 Experimental setup of the batch experiments	40

4.1.3	SEM sample preparation and selection of solids for characterization	42
4.1.4	Image analysis of FIB cross-sections	42
4.2	Characterization methods	43
4.3.1	Atom Probe Tomography (APT)	43
4.3.1	Transmission Electron microscopy	44
4.3.1	Correlated microscopy: Electron microscopy and APT	44
4.3.1	FIB Tomography	46
5	Results and discussion	48
5.1	Adaption of FIB preparation to barite samples	48
5.1.1	Preparation of cross-section lamellae	49
5.1.2	Preparation of plan-view TEM lamella	50
5.1.3	Preparation of APT tips	52
5.2	Internal microstructure of the initial barite	54
5.2.1	SEM observations of the internal barite microstructure.....	54
5.2.2	Selected Area Electron Diffraction of the initial barite	56
5.2.3	Scanning Transmission Electron Microscopy of the initial barite	57
5.2.4	Atom Probe Tomography of the initial barite	59
5.2.5	FIB tomography of the initial barite	64
5.2.6	Correlated microscopy of the initial barite by STEM and APT	67
5.2.7	High resolution transmission electron microscopy of the initial barite	68
5.2.8	Possible origins of the fluid inclusions in the initial barite	69
5.2.9	Identified pathways for Ra uptake into barite	70
5.2.10	Internal microstructure of AL reference barite	71
5.2.11	Changes of the internal microstructure due to barite recrystallization	73
5.3	Changes in the internal microstructure due to Ra uptake	80
5.3.1	Scanning electron microscopy observations of changes in the barite microstructure due to Ra uptake.....	82

5.3.2	SEM observations of the FIB cross-sections	84
5.3.3	Scanning Transmission Electron Microscopy	85
5.3.4	Transmission Electron Microscopy	87
5.3.5	Single Area Electron Diffraction	88
5.4	Changes in the Ra distribution.....	88
5.4.1	STEM-EDX Mappings.....	89
6	Conclusion	94
7	Outlook	99
8	List of figures	101
9	List of tables.....	109
10	References.....	110
11	Acknowledgments.....	130
12	Already published parts of this PhD	133
13	Curriculum vitae	135
14	Eidesstattliche Erklärung.....	136
15	Appendix.....	137
