Content

Abstract.....	i
Kurzzusammenfassung	iii
List of Abbreviations	ix
1 Introduction and Background.....	1
1.1 The Role of Nuclear Energy	1
1.2 The Nuclear Fuel Cycle	2
1.3 Hydrometallurgical Separation of Actinides	6
1.4 Transmutation.....	8
1.5 Accelerator Driven System	9
1.6 Inert Matrix Fuels	11
1.6.1 Potential Problems during Reprocessing of IMF	13
1.7 Dissolution	15
1.8 Background Chemistry	17
1.8.1 Nitric Acid	17
1.8.2 Magnesium Oxide.....	18
1.8.2.1 Dissolution of Magnesium Oxide	19
1.8.3 Molybdenum.....	20
1.8.3.1 Dissolution Chemistry of Molybdenum.....	21
1.8.3.2 Speciation of Molybdenum in Aqueous Solution	24
1.8.3.3 The Chemistry of Mo(VI) in Solution	25
1.8.3.4 Hydrates and Oxides of Molybdenum in the Solid State	29
1.8.3.5 Extraction Chemistry of Molybdenum	31
1.8.4 Actinides Oxides	32
1.8.4.1 Dissolution of Actinide Oxides in Nitric Acid.....	34
1.9 Electrospray Ionization Time-of-Flight Mass Spectrometry	35
1.9.1 Electrospray Ionization Source	35
1.9.2 Time-of-Flight Analyser.....	36
2 Aim of this Work	39
3 Experimental	41
3.1 Pellet Fabrication.....	41
3.1.1 MgO Pellets	41
3.1.2 MgO/CeO ₂ Pellets	41
3.1.3 Mo Pellets.....	42
3.1.4 Mo/CeO ₂ Pellets	42
3.2 Physical Properties and Microstructure of the Pellets.....	43

3.2.1	Determination of the Compressibility and the Sinterability of the Powders	43
3.2.2	Micro Hardness, Fracture Toughness and Brittleness.....	43
3.2.2.1	Micro Hardness H_V	43
3.2.2.2	Fracture Toughness K_{IC} and Young's Modulus E	44
3.2.2.3	Brittleness B_i	45
3.2.3	Pellet Microstructure.....	45
3.2.3.1	Scanning Electron Microscope	45
3.2.3.2	Powder X-ray Diffraction Analysis.....	46
3.3	Dissolution Experiments.....	47
3.4	Speciation of Molybdenum in Nitric Acid.....	49
3.4.1	ALBATROS ESI-ToF	49
3.4.1.1	Sample Preparation.....	49
3.4.2	Commercially Available ESI/MS/MS Instrument (QTrap)	50
3.4.2.1	Development of a Measurement Protocol.....	50
3.4.2.2	Measurement Conditions.....	51
3.4.3	Raman Spectroscopy	52
3.5	Separation of Molybdenum by Thermal Treatment	53
3.6	Extraction Experiments.....	54
4	Results and Discussion	57
4.1	Magnesium Oxide as CerCer Matrix Element	57
4.1.1	Physical Properties and Microstructure.....	57
4.1.1.1	Compactibility and Sinterability	57
4.1.1.2	Micro Hardness	61
4.1.1.3	Fracture Toughness and Brittleness Index	63
4.1.1.4	Scanning Electron Microscopy Investigation.....	65
4.1.2	Dissolution Behaviour	69
4.1.2.1	Mechanism of MgO Dissolution	69
4.1.2.2	Temperature Dependence.....	72
4.1.2.3	Acid Concentration Dependence	75
4.1.2.4	Influence of Agitation Velocity.....	76
4.1.2.5	Density Dependence	76
4.1.2.6	Evolution of the Pellet Surface.....	77
4.1.2.7	Surface Normalization of the Dissolution Rate.....	80
4.1.2.8	Dissolution of Mixed MgO/CeO ₂ Pellets.....	83
4.1.2.9	Comparison of the Dissolution of MgO from Pure and Mixed Pellets	87
4.2	Molybdenum as CerMet Matrix Element.....	89
4.2.1	Physical Properties and Microstructure.....	89
4.2.1.1	Densities of the Pellets	89
4.2.1.2	Investigation of Micro Hardness.....	91
4.2.1.3	Scanning Electron Microscopy Investigations	91
4.2.2	Dissolution Behaviour	93

4.2.2.1	Dissolution in Nitric Acid	93
4.2.2.2	Dissolution in Nitric Acid with Ferric Nitrate as Additive	97
4.2.2.3	Dissolution Experiments on Mixed Mo/CeO ₂ Pellets.....	100
4.2.2.4	Mechanism and Kinetics.....	102
4.2.2.5	Mo/PuO ₂ Pellets	104
4.2.3	Speciation of Molybdenum in Nitric Acid Medium	110
4.2.3.1	ALBATROS ESI-ToF.....	110
4.2.3.2	Commercially Available ESI/MS/MS Instrument (QTrap)	118
4.3	Extraction Studies	133
4.4	Separation of Molybdenum by Thermal Treatment	136
4.4.1	Pure Molybdenum	136
4.4.2	Mo/CeO ₂ Powder Mixtures (TG-DSC).....	137
4.4.3	Mo/CeO ₂ Powder Mixtures (Furnace Experiments).....	138
4.4.4	Mo/CeO ₂ Pellets (Furnace Experiments)	141
4.4.5	Mo/CeO ₂ Pellets (TG-DSC)	143
4.4.6	Mo/PuO ₂ Mixtures (Considerations).....	143
5	Conclusions and Outlook	145
6	References	149
7	Acknowledgements	161
	Publications and Presentations of this Work.....	163
