Multivariate Methods for Life Safety Analysis in Case of Fire

Benjamin Schröder

Schriften des Forschungszentrums Jülich
IAS Series Band 34

ISSN 1868-8489 ISBN 978-3-95806-254-2

Contents

1 Introduction **1**

1.1 Motivation . . . 1
1.2 Underground Transportation Systems . . . 2
1.2.1 Challenges . . . 3
1.2.2 Major Fire Incidents . . . 3
1.2.3 Case Study: Osloer Straße . . . 8
1.3 State of the Art . . . 10
1.3.1 Fire Safety Engineering . . . 10
1.3.2 Human Behaviour in Fire . . . 13
1.3.3 Research Projects . . . 16
1.4 Methodology and Objectives . . . 17
1.5 Thesis Outline . . . 18

2 Methodology **20**

2.1 System Formation . . . 20
2.2 Performance-based Design Process . . . 22
2.3 Problem Definition . . . 25
2.3.1 Project Scope . . . 25
2.3.2 Safety Goals . . . 26
2.4 ASET vs. RSET . . . 27
2.4.1 Objective . . . 27
2.4.2 Performance Criteria . . . 28
2.4.3 Challenges . . . 29
2.5 Scenarios . . . 30
2.5.1 Fire Scenarios . . . 31
2.5.2 Occupant Scenarios . . . 31
2.5.3 Combination and Classification . . . 32
2.5.4 Challenges . . . 35

2.6 Design and Analysis of Simulation Experiments 36
2.6.1 Design of Experiment 37
2.6.2 Data Analysis 38

3 Extending the Fire and Evacuation Models 40
3.1 Fire Simulations and Underground Climate 40
3.1.1 Climate Modelling 42
3.1.2 Data Basis 45
3.1.3 Results 49
3.2 Coupling of Fire and Evacuation Simulations 50
3.2.1 Individual Detection 53
3.2.2 Route Choice 53
3.2.3 Walking Speed Reduction 57
3.2.4 Fire Hazard Analysis 61

4 Fire Simulation 68
4.1 Fire Model and Computation 68
4.2 Auxiliary Specifications 70
4.2.1 Built Environment 70
4.2.2 Combustibles 73
4.2.3 Fire Sources 75
4.3 Fire Scenarios 76
4.3.1 Fire Locations 79
4.3.2 Design Fires 80
4.3.3 Climatic Conditions 85
4.4 Sampling 86
4.5 Preliminary Analysis 87
4.5.1 ASET Maps 88
4.5.2 Correlation Analysis 93
4.6 Summary 99

5 Evacuation Simulation 101
5.1 Evacuation Model and Computation 101
5.1.1 Evacuation Model 101
5.1.2 Computation 102
5.2 Geometry 104
5.3 Occupant Scenarios 105

5.3.1 Built Environment . . . 106
5.3.2 Safety Measures . . . 107
5.3.3 Occupancy and Occupants . . . 108
5.3.4 Hazard . . . 125
5.4 Sampling . . . 126
5.5 Preliminary Analysis . . . 127
5.5.1 RSET Maps . . . 127
5.5.2 Correlation Analysis . . . 130
5.6 Summary . . . 132

6 Life Safety Analysis 134
6.1 Ensemble Combination . . . 134
6.2 Workflow . . . 136
6.3 Semi-macroscopic Analysis . . . 137
6.3.1 Difference Maps . . . 137
6.3.2 Cluster Identification . . . 142
6.3.3 Enrichment Analysis . . . 146
6.4 Microscopic Analysis . . . 158
6.5 Comparison of Semi-macroscopic and Microscopic Analysis . . . 163
6.6 Summary . . . 165

7 Closing Remarks 166
7.1 Conclusions . . . 166
7.2 Outlook . . . 168

Appendix A Design of Experiment 171
A.1 Fire Simulation . . . 171
A.1.1 U8 Level . . . 171
A.1.2 U9 Level . . . 172
A.1.3 Concourse Level . . . 173
A.2 Evacuation Simulation . . . 174

Appendix B Data Analysis Routines 177
B.1 ASET Map Generation . . . 177
B.2 RSET Map Generation . . . 181
B.3 Difference Map Generation . . . 185

Appendix C Life Safety Analysis **188**
C.1 Scenario Cluster C 189
C.2 Scenario Cluster D 192
C.3 Scenario Cluster E 195
C.4 Scenario Cluster G 198
C.5 Scenario Cluster H 201
C.6 Scenario Cluster I 204

Appendix D List of Publications **207**

Bibliography **209**
