# Contents

<b>Zusammenfassung.....</b>	<b>1</b>
<b>Abstract .....</b>	<b>3</b>
1. Introduction .....	9
1.1 Nitrogen transformations in soil and current problems .....	9
1.2 Different microbial pathways for N <sub>2</sub> O production and consumption in soils .....	10
1.3 Nitrification inhibitors and their effect on N <sub>2</sub> O emission.....	12
1.4 Objectives and hypotheses .....	14
2. Methodology .....	15
2.1 Measurement of trace gases.....	15
2.2 Analysis of N <sub>2</sub> O isotope signature and <sup>15</sup> N site preference .....	17
3. General discussion.....	19
3.1 Potential use of N <sub>2</sub> O isotopomer analysis for N <sub>2</sub> O source tracing in lab and field studies .....	19
3.2 Factors affecting the mitigation effectiveness of NIs on N <sub>2</sub> O emission.....	21
3.3 Effect of NIs on soil microbes.....	24
3.4 Effect of NIs on denitrification and nitrifier denitrification .....	25
3.5 Effect of NIs on soil oxygen availability.....	26
3.6 Alternative approach for N <sub>2</sub> O mitigation .....	27
4. Conclusions .....	29
5. Perspectives .....	31
6. References .....	33
<b>Acknowledgements .....</b>	<b>40</b>
Paper I .....	42
Paper II .....	50
Paper III.....	62
Paper IV.....	71
Paper V .....	102
Paper VI.....	123
Paper VII .....	133
Paper VIII.....	144
Paper IX.....	154
Paper X.....	165
Paper XI.....	175
