Mechanical Characterization of Solid Oxide Fuel Cells and Sealants

Jianping Wei

Schriften des Forschungszentrums Jülich
Reihe Energie & Umwelt / Energy & Environment

Band / Volume 391

ISSN 1866-1793

ISBN 978-3-95806-266-5

Content

1. Introduction	1
2. Scope of the work	4
3. Literature review	6
3.1. Production of cells	6
3.2. Anode materials	8
3.2.1. Working principle	8
3.2.2. Anode failures.....	11
3.3. Sealants.....	13
3.3.1. State of sealants for SOFC application	13
3.3.2. Reinforcement of glass-ceramic sealants	17
3.3.3. Failure of sealants in SOFC stacks	19
3.4. Mechanical characteristics	20
3.4.1. Elastic behavior	21
3.4.2. Fracture strength	25
3.4.3. Fracture toughness	29
3.4.4. Creep	32
3.4.5. Mechanical properties of anode-relevant materials	40
3.4.6. Mechanical properties of sealants.....	49
4. Experimental.....	54
4.1. Materials.....	54
4.1.1. Anode substrate materials	54
4.1.2. Sealant materials.....	56
4.2. Microstructural characterization	59
4.2.1. Microscopy	59
4.2.2 X-ray diffraction	60
4.3. Mechanical characterization	60
4.3.1. Fracture toughness	60
4.3.2. Creep behavior	63

4.3.3.	Finite element simulation	67
4.3.4.	Bending strength.....	68
4.3.5.	Torsion strength (shear strength)	71
5.	Results and discussion.....	73
5.1.	Anode material.....	73
5.1.1.	Microstructure	73
5.1.2.	Fracture toughness by double torsion test	76
5.1.3.	Creep behavior.....	89
5.2.	Sealant materials.....	105
5.2.1.	Microstructure and XRD analysis	105
5.2.2.	Bending fracture stress.....	112
5.2.3.	Annealing effects	117
5.2.4.	Complementary 3-point-bending tests on 7.5 B(Ba) and 10 B(Sr) bar specimens	120
5.2.5.	Shear strength	121
6.	Conclusions	127
7.	References	131
	Acknowledgement	142
	Appendix	143
	List of figures.....	146
	List of tables	150
