Acknowledgements	i
Abstract	iii
Zusammenfassung	v
List of Figures	viii
List of Tables	xi
List of abbreviations	xiii
Chapter 1	1
1.1 Theory.....	2
1.2 Rationale.....	3
1.3 State of the art	5
1.3.1 Mechanisms of N ₂ O production from NH ₃ oxidation	5
1.3.2 Reactive N intermediates NH ₂ OH and NO ₂ ⁻	6
1.3.3 Effects of soil properties and environmental factors	8
1.4 Objectives and outline of the thesis	9
Chapter 2	11
2.1 Introduction	12
2.2 Materials and methods	15
2.2.1 Strains and cultivation	15
2.2.2 Incubation experiments.....	16
2.2.3 Determination of abiotic NH ₂ OH decay rates under ambient air conditions.....	16
2.2.4 Chemical assays	17
2.2.5 Calculation of the NH ₂ OH:final product ratio	17
2.2.6 Calculation of the fraction of NH ₄ ⁺ converted to N ₂ O during incubation	18
2.2.7 Data analyses	19
2.3 Results and discussion	19
2.3.1 Extracellular NH ₂ OH from autotrophic ammonia oxidizers.....	19
2.3.2 NH ₂ OH abiotic decay and NH ₂ OH:final product ratios during NH ₃ oxidation	24
2.3.3 Estimating the fraction of NH ₄ ⁺ converted to N ₂ O during NH ₃ oxidation under ambient air conditions	27
2.4 Conclusions	29
Chapter 3	31
3.1 Introduction	32

3.2 Materials and methods.....	33
3.2.1 Soils	33
3.2.2 Principle of the assay.....	34
3.2.3 Experimental design	35
3.2.4 Statistical analyses	37
3.3 Results and discussion	38
3.3.1 Soil NH ₂ OH extractions	38
3.3.2 Nitrite removal.....	40
3.3.3 NH ₂ OH concentration in forest soil samples and its correlation with aerobic N ₂ O emission rate.....	41
3.4 Conclusions	43
Chapter 4	45
4.1 Introduction	46
4.2 Materials and methods.....	48
4.2.1 Experimental site	48
4.2.2 Soil sampling.....	49
4.2.3 Analytical methods.....	50
4.2.4 Data analyses	51
4.3 Results	52
4.3.1 Potential soil N ₂ O emission rates, NH ₂ OH content and basic properties	52
4.3.2 Spatial patterns.....	54
4.3.3 Correlations and multiple stepwise regressions.....	55
4.3.4 Improvement of spatial estimation	57
4.4 Discussion	59
4.4.1 Spatial patterns of potential soil N ₂ O emission rates and soil NH ₂ OH content	59
4.4.2 The contribution of NH ₂ OH to soil potential N ₂ O emission	60
4.5 Conclusions	62
Chapter 5	63
5.1 Introduction	64
5.2 Methods	67
5.2.1 Preparation of the artificial soil mixtures	67
5.2.2 Preparation of artificial soil mixtures with different OM qualities	67
5.2.3 Addition of NH ₂ OH to the artificial soil mixtures and analysis of the N ₂ O formed ...	68
5.2.4 Calculation of the NH ₂ OH-to-N ₂ O conversion ratio	68

5.2.5 Determination of the basic properties of the organic materials.....	69
5.2.6 Data analyses	70
5.3 Results and discussion	70
5.3.1 $R_{\text{NH}_2\text{OH-to-N}_2\text{O}}$ at different pH, MnO_2 and OM contents (%)	70
5.3.2 $R_{\text{NH}_2\text{OH-to-N}_2\text{O}}$ at different pH, MnO_2 content, and OM quality	73
5.3.3 Development of a stepwise multiple regression model from the artificial soil mixtures and application to natural soils	76
Chapter 6	79
6.1 Introduction	80
6.2 Materials and methods	82
6.2.1 Soil collection	82
6.2.2 Oxidic and anoxic pre-treatment of soil	83
6.2.3 Addition of reactive N to freeze-dried soils.....	83
6.2.4 N_2O analysis	84
6.2.5 Soil chemical analyses	84
6.2.6 Data analyses	85
6.3 Results	85
6.3.1 Effect of reactive N addition on N_2O production in different soils.....	85
6.3.2 Effect of anoxic pre-incubation on N_2O production from reactive N addition	87
6.3.3 Contribution of abiotic pathways to N_2O production from reactive N addition	88
6.3.4 Controls of the effect of reactive N addition on N_2O production in soils after oxidic and anoxic pre-incubation.....	88
6.4 Discussion	90
6.4.1 The importance of NO_2^- and NH_2OH on biotic and abiotic N_2O formation in different soils.....	90
6.4.2 Effect of soil redox history on N_2O formation from NO_2^- and NH_2OH	91
6.5 Conclusions	93
Chapter 7	95
7.1 Introduction	96
7.2 Materials and methods.....	98
7.2.1 Soil collection	98
7.2.2 Experimental setup	99
7.2.3 Data analyses	102
7.3 Results	102

7.3.1 Soil basic properties	102
7.3.2 Mineral N and DOM content before and after drying.....	103
7.3.3 Rewetting effects on soil N ₂ O emissions.....	105
7.3.4 Influence of γ-irradiation on soil N ₂ O and CO ₂ emissions after rewetting.....	107
7.3.5 Control variables of soil N ₂ O emission upon rewetting	108
7.3.6 Isotopic ratio analyses of N ₂ O production during rewetting	109
7.4 Discussion	110
7.5 Conclusions	114
Chapter 8	115
8.1 Synopsis	116
8.2 Synthesis.....	119
8.3 Perspectives	123
References	126
Appendix	139
Figure S2.1	139
Figure S2.2	140
Figure S2.3	141
Figure S2.4	142
Figure S5.1	143
Figure S5.2	144
Figure S5.3	145
Figure S5.4	146
