## Table of Content

1. Abstract.....	1
2. Introduction.....	7
2.1. Nuclear fission and fission products .....	8
2.2. Transuranium elements .....	10
2.3. Options of spent fuel management .....	12
2.4. The nuclear fuel cycle.....	15
2.5. Solvent extraction .....	17
2.5.3. Heterocyclic N-donor ligands for actinide lanthanide separation.....	23
2.5.4. Hydrophilic complexants for masking of fission products. ....	25
2.7. Advanced partitioning concepts for actinide recycling .....	27
2.7.1. Homogenous recycling: The Euro-GANEX process .....	29
2.7.2. Heterogeneous recycling.....	29
2.8. Fluorescence-spectrometric investigations on Eu(III) and Cm(III) complexes.....	36
3. Scope of work .....	41
4. Experimental Part.....	43
4.1. Materials.....	43
4.2. Methods .....	43
4.2.1. Batch solvent extraction experiments.....	43
4.2.2. Actinide loading experiments.....	44
4.2.3. Composition of the i-SANEX process demonstration feed solution.....	44
4.2.4. Continuous counter-current extraction in centrifugal contactors .....	45
4.2.5. Radiolysis experiments .....	49
4.2.6. Time resolved laser-fluorescence spectrometry (TRLFS) .....	49
4.2.7. Gamma spectrometry .....	51
4.2.8. Alpha spectrometry.....	51
4.2.9. Inductive coupled Plasma (ICP) based stable element analysis .....	51
4.2.10. Mixer-cell experiments for TPAEN extraction kinetics.....	52
4.2.11. Acidity and pH measurement.....	52

## Table of Content

---

5. Results and Discussion.....	53
5.1. Innovative SANEX Process for the separation of Am(III) from RUREX raffinate.....	53
5.1.2. Description of the Flow-Sheet .....	55
5.2. Ligand screening for selective separation of Am(III) from PUREX raffinate .....	69
5.2.1. Screening of hydrophilic complexing agents.....	69
5.2.2. TS-BTPhen.....	70
5.2.3. Pytri-Diol.....	73
5.2.4. H <sub>4</sub> TPAEN.....	75
5.2.5. Promising ligand-complexant combinations for a selective separation of Am(III) .....	77
5.3. TS-BTPhen as Am(III) selective complexant .....	78
5.3.1. Influence of the nitric acid concentration .....	79
5.3.2. Behavior of the lanthanides.....	81
5.3.3. Effect of the TS-BTPhen-concentration .....	82
5.3.4. Influence of TODGA concentration.....	84
5.3.5. Batch kinetics.....	85
5.3.6.1. Cm(III) TRLFS -studies of TS-BTPhen complexes.....	87
5.3.6.2. Biphasic Cm(III) TRLFS -Experiments.....	95
5.3.6.3. Eu(III) TRLFS-studies with TS-BTPhen .....	97
5.3.8. Conclusions for TS-BTPhen.....	106
5.4. H <sub>4</sub> TPAEN as selective stripping agent for Am(III) .....	107
5.4.1. Solvent Extraction studies on TPAEN.....	108
5.4.1.1. Influence of the nitric acid concentration .....	108
5.4.1.2. Solubility of H <sub>4</sub> TPAEN .....	109
5.4.1.3. Influence of the H <sub>4</sub> TPAEN concentration .....	110
5.4.1.4. Behavior of the Lanthanides .....	113
5.4.1.5. Stripping from a spiked, simulated loaded solvent .....	114
5.4.1.6. Effect of the Am(III) concentration on the TODGA-TPAEN-system.....	117
5.4.1.7. Radiolysis of H <sub>4</sub> TPAEN.....	124
5.4.1.8. Batch extraction kinetics .....	127
5.4.1.9. Kinetics experiments in mixer cell system.....	128

5.4.1.10.	Effect of Temperature on the TODGA – TPAEN system.....	131
5.4.2.	TRLFS Studies on TPAEN.....	133
5.4.2.1.	Cm(III) TRLFS with H <sub>4</sub> TPAEN.....	133
5.4.2.2.	Eu(III)-TRLFS with H <sub>4</sub> TPAEN.....	142
5.4.2.3.	Thermodynamic investigations on Eu(III)- and Cm(III)-TPAEN complexes using TRLFS.....	150
5.4.2.4.	Biphasic Cm-TRLFS experiments.....	154
5.4.3.	Conclusions to H <sub>4</sub> TPAEN.....	155
6.	Summary.....	156
7.	Outlook.....	159
8.	References.....	160
