Understanding the formation of wait states in one-sided communication

Marc-André Hermanns

Schriften des Forschungszentrums Jülich
Reihe IAS

Band / Volume 35

ISSN 1868-8489

ISBN 978-3-95806-297-9

Contents

Abstract	iii
Zusammenfassung	v
Acknowledgement	vii
Contents	ix
List of Figures	xi
List of Tables	xiii
1. Introduction	1
1.1. Parallel system architectures	2
1.2. One-sided communication in the context of programming models in HPC	5
1.2.1. Introduction to programming models in HPC	5
1.2.2. The message passing model	7
1.2.3. Scope of application of one-sided communication	10
1.3. Performance analysis of one-sided communication	11
1.3.1. Performance optimization cycle	11
1.3.2. Performance tools	15
1.4. Contribution of this thesis	20
2. Event-trace analysis using communication replay	23
2.1. Event tracing	26
2.2. Definition of wait states based on event models	29
2.3. The communication-replay analysis method	30
3. Wait states in one-sided communication	33
3.1. A generic event model for one-sided communication	33
3.1.1. MPI	36
3.1.2. ARMCI	40
3.1.3. SHMEM	41
3.2. Defining wait states	44
3.2.1. Terminology	44
3.2.2. Active target synchronization	46
3.2.3. Passive target synchronization	51
3.3. Scalable detection of wait states in one-sided communication	55
3.3.1. Active-target synchronization	56
3.3.2. Passive-target synchronization	59
4. A unified model for critical-path detection and wait-state formation	67
4.1. Root causes of wait states in one-sided communication	68
4.1.1. Delay	68

Contents

4.1.2. Contention	70
4.1.3. Propagation	72
4.1.4. A unified cost model	75
4.2. The critical path in one-sided communication	81
4.3. A scalable analysis framework	83
4.3.1. Detection of synchronization and contention points	84
4.3.2. Computing the critical path	88
4.3.3. Computing costs in the unified wait-state formation model	92
5. Evaluation	97
5.1. SOR	98
5.2. BT-RMA	100
5.3. CGPOP	105
5.4. SRUMMA	107
5.5. NWChem	110
5.6. Lock Contention Microbenchmark	111
6. Conclusion and outlook	117
A. Measurement Data	119
A.1. SOR	119
A.2. BT-RMA	121
A.3. CGPOP	123
A.4. SRUMMA	123
Definitions	125
Statement of publications	127
Bibliography	129
Websites	143
