Contents

List of figures.....	IX
List of tables.....	XIV
1 Introduction	1
2 State of the art.....	8
2.1 Fundamental principles of perovskites ABO ₃	8
2.1.1 Crystallography	8
2.1.2 Electronic and magnetic properties of perovskites	11
2.1.2.1 Exchange interaction	11
2.1.2.2 Charge-, spin- and orbital-ordering	14
2.1.3 Principal aspects of defect chemistry	17
2.1.3.1 Classification of defects in crystals	17
2.1.3.2 The equilibrium state: Gibbs free energy and the law of mass action	19
2.1.3.3 Conservation rules	22
2.1.3.4 Kröger–Vink notation	22
2.1.3.5 Intrinsic and extrinsic point defects in ionic crystal	23
2.1.3.6 Defect chemistry of titanates	25
2.1.3.6.1 Defect chemistry for acceptor-doped SrTiO ₃	26
2.1.3.6.2 Defect chemical modeling for SrTiO ₃	29
2.1.3.6.3 Defect chemistry of donor-doped BaTiO ₃	31
2.1.3.7 Planar defects: Grain boundaries	33
2.2 Emerging applications.....	35
2.2.1 Non-volatile memories based on resistive switching	35
2.2.2 High temperature ceramic thermoelectric generators	38

3	Theory of electrical transport and polarization	41
3.1	Metallic conductors	41
3.2	Semiconductors	43
3.3	Insulators.....	46
3.3.1	Ionic conductors.....	46
3.3.2	Dielectrics.....	47
3.3.2.1	Polarization	48
3.3.2.2	The complex dielectric function theory.....	51
3.3.2.3	Resistance and impedance	52
3.3.2.4	Maxwell-Wagner relaxation	53
3.3.2.5	Relaxation time.....	53
3.3.2.6	Debye relaxation.....	54
3.3.2.7	Poisson's equation	55
3.3.2.8	Ohmic contact.....	55
3.3.2.9	Schottky barrier contacts	56
3.3.2.10	Brick-wall model and equivalent circuit	58
4	Experimental	62
4.1	Materials synthesis and ceramic processing	63
4.1.1	Powder preparation and calcination process	63
4.1.2	Ceramic preparation and sintering process.....	63
4.2	Crystallographic, microstructural, and analytical characterization	65
4.2.1	Particle size distribution (Laser scattering).....	65
4.2.2	X-ray diffraction	65
4.2.3	Scanning electron microscopy (SEM).....	66
4.2.4	Energy-dispersive X-ray spectroscopy (EDX)	67
4.2.5	Raman Spectroscopy.....	68

4.2.6	Dilatometry	69
4.2.7	Thermogravimetric analysis (TGA).....	71
4.2.8	Quantification of Oxygen-deficiency by iodometric titration.....	72
4.2.8.1	Specific detection for stoichiometric and Yb-doped CaMnO_3	73
4.3	Electrical characterization.....	73
4.3.1	Complex impedance spectroscopy	73
4.3.2	DC-conductivity measurement	75
5	Optimization of powder and ceramic preparation	76
5.1	Calcination with respect to temperature and oxidizing atmosphere.....	78
5.2	Sintering with respect to different gas composition types	80
5.3	Stoichiometric Calcium manganite	81
5.3.1	Microstructure, phase purity and crystallography	81
5.3.2	Dilatometry and thermal expansion	85
5.3.3	Thermogravimetric analysis (TGA).....	87
5.4	Non-stoichiometric calcium manganite: Ca- & Mn-excess.....	89
5.4.1	Microstructure, phase purity and crystallography	89
5.4.2	Dilatometry and thermal expansion	91
5.4.3	Thermogravimetric analysis (TGA).....	93
5.5	Donor doping: Yb-doped calcium manganite	94
5.5.1	Microstructure, phase purity and crystallography	94
5.5.2	Dilatometry and thermal expansion	96
5.5.3	Thermogravimetric analysis (TGA).....	99
5.6	Determination of the average Mn-valence-state by iodometric titration	102
5.6.1	Stoichiometric and Yb-doped CaMnO_3	102
5.6.2	Non-stoichiometric CaMnO_3 : Ca- & Mn-excess	104
5.7	Conclusions	105

6	Electronic characterization: impedance data analysis.....	111
6.1	Complex impedance analysis.....	111
6.2	Dielectric properties	112
6.2.1	Frequency dependence of dielectric permittivity	112
6.2.2	The effect of Yb-contents on dielectric permittivity as a function of temperature.....	113
6.3	Electrical equivalent circuit model.....	115
6.4	The effect of temperature on the fitted electrical equivalent circuit	117
6.5	The effect of different Yb-contents on resistance as a function of temperature	118
6.6	Conclusions	120
7	Electronic characterization: analysis of DC-conductivity	123
7.1	The main reactions in defect chemical model.....	123
7.2	The defect chemistry modeling for undoped Calcium manganite	127
7.3	The influence of doping on conductivity: Yb-doped calcium manganite	132
7.3.1	The effect of oxygen vacancies on conductivity	136
7.4	The defect chemistry modeling for donor-doped calcium manganite.....	138
7.4.1	Low doping level: 0.1 at. % Yb-dopant concentration.....	138
7.4.2	High doping level: 10 at. % Yb-dopant concentration.....	142
7.5	The defect chemistry modeling for acceptor-doped calcium manganite	145
7.6	Conclusions	146
8	Summary	150
9	References	154
