Cathode Stability and Processing in Inert Substrate-Supported Solid Oxide Fuel Cells

Eric Matte

Schriften des Forschungszentrums Jülich
Reihe Energie & Umwelt / Energy & Environment

Band / Volume 445

ISSN 1866-1793

ISBN 978-3-95806-373-0

Content

1.	Introduction and motivation.....	1
1.1.	Goal of the thesis.....	4
2.	Literature and basic principles	7
2.1.	The Solid Oxide Fuel Cell.....	7
2.2.	Materials for SOFC	10
2.3.	Cell and stack design.....	24
2.4.	Interaction and Degradation	30
2.5.	Summary.....	38
3.	Experimental Methods.....	39
3.1.	Materials and ink preparation	39
3.2.	Sample preparation.....	41
3.3.	Electrochemical Impedance spectroscopy	45
3.4.	Galvanostatic measurements	53
3.5.	Material analysis method.....	54
4.	Interaction between cathode and support material.....	57
4.1.	Solid-state reactions	57
4.2.	Reaction between substrate and cathode materials.....	60
4.3.	Reaction at the Forsterite/cathode interface.....	70
4.4.	Improvement of cathode/substrate interface.....	81
4.5.	Discussion.....	84
5.	Effect of processing conditions on cathode performance	85
5.1.	Electrochemical performance and influence of sintering temperature 85	
5.2.	Origin of the degradation.....	104
5.3.	Solution against poisoning: Getter material	114
5.4.	Discussion.....	119
6.	Cathode stability under operation.....	121
6.1.	Stability at open circuit voltage	121
6.2.	Effect of overpotential	130
6.3.	Discussion.....	140

7. General discussion and summary	143
7.1. General discussion.....	143
7.2. Summary.....	148
References.....	151
List of figures.....	166
List of tables.....	171
