# Scattering!

## Soft, Functional and Quantum Materials

Lecture Notes

Schlüsseltechnologien / Key Technologies

Band / Volume 190

ISBN 978-3-95806-380-8

Forschungszentrum Jülich GmbH  
Jülich Centre for Neutron Science (JCNS);  
Peter Grünberg Institute (PGI);  
Institute of Complex Systems (ICS);  
Institute for Advanced Simulation (IAS)

Lecture Notes of the  
50<sup>th</sup> IFF Spring School 2019

Manuel Angst, Thomas Brückel,  
Stephan Förster, Karen Friese,  
Reiner Zorn (Eds.)

## **Scattering!**

### **Soft, Functional and Quantum Materials**

This Spring School was organized by  
the Institutes JCNS, PGI, ICS and IAS  
of the Forschungszentrum Jülich  
on 11 until 22 March 2019.

In collaboration with Universities and  
research institutions.

Schriften des Forschungszentrums Jülich

# Contents

Preface

## **A Basics - Scattering**

- A01 Scattering - introduction and overview  
*Th. Brückel & S. Förster*
- A02 Scattering theory: Born series and dynamical theory  
*S. Blügel*
- A03 Interaction of x-rays, neutrons and electrons with matter  
*D. DiVincenzo*
- A04 Correlation functions measured by scattering experiments  
*R. Zorn*

## **B Basics - Materials**

- B01 Crystal structures and symmetries  
*G. Roth*
- B02 Quasicrystals and modulated structures  
*M. Dulle*
- B03 The structure of complex fluids  
*H. Frielinghaus*
- B04 Dynamics of large molecules and membranes  
*O. Holderer*
- B05 Elementary excitations in crystalline matter: phonons and magnons  
*N. Violini*
- B06 Crystal-field theory  
*E. Pavarini*

## **C Sources and Instrumentation**

- C01 How to write a good proposal  
*F. Carsughi*
- C02 Neutron sources and instrumentation  
*U. Rücker*
- C03 Synchrotron radiation sources and instrumentation  
*U. Klemradt*
- C04 Polarisation handling  
*J. Voigt*
- C05 European XFEL  
*R. Feidenhans'l*
- C06 ESS  
*A. Schreyer*
- C07 Accelerator based high brilliance neutron sources  
*T. Gutberlet*

## **D Techniques**

- D01 Small angle scattering  
*S. Jaksch*
- D02 Scattering under grazing incidence  
*E. Kentzinger*

- D03** Powder and single crystal diffractometry: Chemical and magnetic structures  
*M. Meven*
- D04** Inelastic scattering: Lattice and magnetic excitations  
*I. Radelytskyi*
- D05** Quasielastic scattering  
*J. Wuttke*
- D06** High-resolution spectroscopies: spin-echo and speckle spectroscopy  
*S. Pasini*
- D07** Coherent imaging with x-ray free-electron lasers  
*H. Chapman*
- D08** Time-resolved techniques (in the x-ray regime)  
*S. Techert*
- D09** Resonant x-ray scattering: spin, charge, and orbital order  
*M. Angst*

## **E Topical Applications**

- E01** Superconductivity  
*Y. Xiao*
- E02** Polymer structures and dynamics  
*M. Kruteva*
- E03** Quantum materials  
*S. Nandi*
- E04** Thin film heterostructures  
*A. Sarkar*
- E05** Nanoparticles - structure and magnetism  
*S. Disch*
- E06** Energy materials  
*M. Ohl*
- E07** Engineering materials  
*M. Müller*
- E08** Protein crystallography and protein dynamics  
*R. Biehl & T. Schrader*
- E09** Scattering applications in life sciences  
*A. Stadler & A. Koutsoumpas*

## **F Complementary Techniques**

- F01** Neutron imaging  
*M. Strobl*
- F02** Photon-based spectroscopies of electronic and chemical states  
*C. M. Schneider*
- F03** Scanning tunneling microscopy and spectroscopy  
*Ph. Ebert*
- F04** Scanning electron microscopy  
*B. Förster*
- F05** Cryo-transmission electron microscopy  
*M.-S. Appavou*
- F06** Advanced transmission electron microscopy  
*R. Dunin-Borkowski & J. Mayer*
