## Contents

|       |   |    |
|-------|---|----|
| 1     | Motivation and scope of the work .....                  | 1  |
| 2     | Fundamentals .....                                      | 4  |
| 2.1   | Oxygen transport membranes .....                        | 4  |
| 2.1.1 | Oxygen transport .....                                  | 6  |
| 2.1.2 | Asymmetric design .....                                 | 8  |
| 2.1.3 | $\text{SrTi}_{1-x}\text{Fe}_x\text{O}_{3-\delta}$ ..... | 9  |
| 2.2   | Manufacturing of ceramic structures .....               | 11 |
| 2.2.1 | Tape casting .....                                      | 11 |
| 2.2.2 | Ice templating .....                                    | 12 |
| 2.2.3 | Phase inversion .....                                   | 15 |
| 2.3   | Thermo-mechanical properties of ceramic materials ..... | 16 |
| 2.3.1 | Elastic behavior .....                                  | 16 |
| 2.3.2 | Anelasticity .....                                      | 17 |
| 2.3.3 | Fracture stress and reliability .....                   | 20 |
| 2.3.4 | Fracture Toughness .....                                | 23 |
| 2.3.5 | Subcritical crack growth .....                          | 25 |
| 2.3.6 | Creep .....   | 27 |
| 3     | Experimental .....                                      | 33 |
| 3.1   | Powder synthesis .....                                  | 33 |
| 3.2   | Samples Manufacturing .....                             | 34 |
| 3.2.1 | Tape Casting .....                                      | 34 |
| 3.2.2 | Freeze Drying .....                                     | 35 |
| 3.2.3 | Phase inversion casting .....                           | 37 |
| 3.3   | Powder and specimen characterization methods .....      | 37 |

|       |   |    |
|-------|---|----|
| 3.3.1 | X-ray diffraction.....  | 37 |
| 3.3.2 | Laser diffraction .....   | 38 |
| 3.3.3 | Brunauer-Emmett-Teller method for surface area determination .....  | 38 |
| 3.3.4 | Dilatometry.....  | 39 |
| 3.3.5 | Mercury intrusion porosimetry.....  | 39 |
| 3.3.6 | Confocal laser scanning microscopy.....   | 40 |
| 3.3.7 | Scanning electron microscopy.....   | 41 |
| 3.3.8 | Microstructure analysis .....   | 42 |
| 3.4   | Mechanical characterization .....   | 42 |
| 3.4.1 | Depth-sensitive indentation.....  | 42 |
| 3.4.2 | Ring-on-ring bending tests .....  | 46 |
| 3.4.3 | Uncertainty calculation of the subcritical crack growth exponent and the lifetime predictions .....                 | 49 |
| 3.4.4 | Impulse excitation technique.....   | 50 |
| 3.4.2 | Compressive tests .....   | 53 |
| 3.4.3 | Acoustic emission and optic observation of fracture .....   | 54 |
| 3.4.4 | Compressive creep .....   | 55 |
| 4     | Results and discussion.....   | 58 |
| 4.1   | Powder and specimens characterization .....   | 58 |
| 4.1.1 | Powder properties.....  | 58 |
| 4.1.2 | Microstructure of tape cast specimens .....   | 60 |
| 4.1.3 | Microstructure of freeze dried STF25 specimens .....  | 62 |
| 4.1.4 | Phase Inversion .....   | 65 |
| 4.1.5 | Summary .....   | 67 |
| 4.2   | Mechanical properties of $\text{SrTi}_{1-x}\text{Fe}_x\text{O}_{3-\delta}$ membranes: a room temperature study..... | 69 |

|       |  |     |
|-------|--|-----|
| 4.2.1 | Indentation elastic modulus, hardness, and fracture toughness.....   | 69  |
| 4.2.2 | Fracture strength and reliability of dense tape cast STF-X specimens .....   | 72  |
| 4.2.3 | Subcritical crack growth.....  | 77  |
| 4.2.4 | Lifetime predictions .....   | 78  |
| 4.2.5 | Study on the uncertainty of the lifetime predictions .....   | 80  |
| 4.2.6 | Summary .....  | 81  |
| 4.3   | Thermomechanical properties of dense $\text{SrTi}_{0.75}\text{Fe}_{0.25}\text{O}_{3-\delta}$ .....                         | 82  |
| 4.3.1 | Apparent elastic modulus and fracture stress of dense STF25 at 900°C .....   | 82  |
| 4.3.2 | Impulse excitation technique study to identify the predominant mechanism for stress relaxation .....                       | 84  |
| 4.3.3 | Summary .....  | 86  |
| 4.4   | Elasticity, strength, and reliability of porous $\text{SrTi}_{0.75}\text{Fe}_{0.25}\text{O}_{3-\delta}$ specimens .....    | 87  |
| 4.4.1 | Summary .....  | 91  |
| 4.5   | Anisotropic mechanical properties of $\text{SrTi}_{0.75}\text{Fe}_{0.25}\text{O}_{3-\delta}$ ice templated substrates..... | 92  |
| 4.5.1 | Apparent elastic properties and compressive strength .....   | 92  |
| 4.5.2 | Applicability of distinct models for the fracture behaviour of ice templated structures .....                              | 97  |
| 4.5.3 | Summary .....  | 102 |
| 4.6   | Creep behaviour of dense and porous of $\text{SrTi}_{0.75}\text{Fe}_{0.25}\text{O}_{3-\delta}$ .....                       | 104 |
| 4.6.1 | Correction of creep rate for porous materials.....   | 105 |
| 4.6.2 | Steady-state creep parameters .....  | 106 |
| 4.6.3 | Summary .....  | 109 |
| 5     | Conclusions and Outlook .....  | 111 |
|       | List of symbols .....  | 117 |
|       | List of abbreviations.....   | 119 |

|                        |     |
|------------------------|-----|
| Appendix A .....       | 120 |
| Appendix B .....       | 121 |
| Appendix C .....       | 122 |
| Appendix D .....       | 123 |
| Appendix E.....        | 124 |
| References .....       | 125 |
| Index of Figures ..... | 136 |
| Index of Tables.....   | 141 |
| Acknowledgments.....   | 143 |
| Abstract .....         | 145 |
| Kurzfassung.....       | 147 |
