Sodium Ion Conducting Ceramics for Sodium Ion Batteries

Sahir Naqash

Schriften des Forschungszentrums Jülich
Reihe Energie & Umwelt / Energy & Environment

Band / Volume 451

ISSN 1866-1793

ISBN 978-3-95806-382-2

Table of Contents

Abstract	i
Kurzfassung	iii
Table of Contents	iv
List of Abbreviations	vii
Chapter 1: General background	1
Chapter 2: Introduction	4
2.1. State-of-the art Na batteries.....	5
2.2. Na ⁺ ion conducting materials	8
2.2.1. Beta-alumina	8
2.2.2. Polymeric and hybrid solid electrolytes.....	11
2.2.3. Glass and glass-ceramics	11
2.2.4. Na ⁺ Super Ionic Conductors (NASICONs)	12
2.2.5. Structure.....	13
2.2.6. Conduction pathways.....	14
2.2.7. Material design and selection.....	15
2.3. Scope of this thesis.....	16
Chapter 3: Experiments and Methods	18
3.1. Synthesis methods.....	18
3.1.1. Solution Assisted Solid State Reaction (SA-SSR)	18
3.1.2. Pechini synthesis.....	18
3.2. Crystal structure	19
3.2.1. X-ray diffraction	19
3.2.2. Rietveld refinement.....	21
3.3. Powder characterization	22
3.3.1. Elemental analysis (ICP-OES).....	22
3.3.2. Particle size distribution.....	22
3.4. Impedance spectroscopy	22
3.5. Microstructure	24
3.6. Thermal etching.....	25
3.7. Image analysis.....	26
3.8. Thermal Analysis	27
3.8.1. DTA/TG.....	27
3.8.2. Dilatometry	27
Chapter 4: Results and Discussion Part I: Investigation of NZSiP	29
4.1. Synthesis of NASICON	29

4.1.1.	Motivation.....	29
4.1.2.	X-ray diffraction	31
4.1.3.	Elemental analysis (ICP-OES).....	33
4.1.4.	Particle size and Morphology	33
4.1.5.	Microstructure.....	36
4.1.6.	Electrical conductivity	37
4.2.	Processing of NASICON	42
4.2.1.	Motivation.....	42
4.2.2.	X-ray diffraction	43
4.2.3.	Microstructure and Analysis.....	45
4.2.4.	Electrical conductivity	50
4.3.	The effect of Na-excess on NASICON	60
4.3.1.	Motivation.....	60
4.3.2.	Particle size distribution.....	61
4.3.3.	Two-step sintering	62
4.3.4.	Elemental analysis	63
4.3.5.	X-ray diffraction	64
4.3.6.	Thermal analysis	65
4.3.7.	Microstructure.....	67
4.3.8.	Electrical conductivity	68
Chapter 5: Results and Discussion Part II: Orchestrating the NASICON chemistry		74
5.1.	Equimolar Al/Y substituted NASICON.....	74
5.1.1.	Motivation.....	74
5.1.2.	X-ray diffraction	75
5.1.3.	Size of T1 bottleneck	78
5.1.4.	Coefficient of Thermal Expansion.....	80
5.1.5.	Thermal Investigation.....	86
5.1.6.	Microstructure.....	88
5.1.7.	Electrical Conductivity	88
5.2.	Reducing the NASICON processing temperature.....	93
5.2.1.	Motivation.....	93
5.2.2.	Elemental Analysis	94
5.2.3.	X-ray diffraction	96
5.2.4.	Correlation of XRD and Microstructure	98
5.2.5.	Thermal analysis	100
5.2.6.	Dilatometry	102
5.2.7.	Microstructure.....	103

5.2.8. Electrical Conductivity	104
Chapter 6: Summary and conclusions.....	109
References.....	112
List of Tables	126
List of Figures.....	127
Annexes 1	132
Acknowledgements	133
