ISSN 1866-1793

ISBN 978-3-95806-403-4

# Table of content

Nomenclature .....	vii
List of Figures .....	ix
List of Tables .....	xiv
1. Introduction .....	1
1.1 Overview .....	1
1.2 Objectives of this work .....	2
2. Fundamentals and state of the art .....	3
2.1 Inorganic Oxygen transport membranes .....	3
2.1.1 Ceramic membrane material .....	4
2.1.1.1 Requirements of ceramic OTM membrane material .....	4
2.1.1.2 Perovskites .....	5
2.1.2 Dense Mixed Ionic and Electronic Conducting membranes .....	6
2.1.3 Transport mechanism in dense membrane .....	7
2.1.3.1 Bulk transport – Wagner equation .....	8
2.1.3.2 Surface exchange .....	11
2.1.4 Dense membrane modifications for flux improvement .....	14
2.1.4.1 Surface modification .....	14
2.1.4.2 Reduction of membrane thickness .....	14
2.2 Asymmetric membranes .....	14
2.2.1 Transport processes .....	15
2.3 Porous substrate .....	16
2.4 Transport mechanism in porous support .....	17
2.5 Transport models for porous media .....	19
2.5.1 The Binary Friction Model .....	19
2.5.1.1 Single gas permeation .....	21
2.5.1.2 Permeation of gas mixtures .....	22
3. Experimental methods .....	24
3.1 Membrane/sample manufacturing .....	24
3.1.1 Sequential tape casting .....	24
3.1.1.1 Sample preparation .....	25
3.1.2 Freeze casting .....	25
3.1.2.1 Sample preparation .....	26
3.2 Oxygen permeation .....	27
3.3 Analysis of microstructure .....	27
3.3.1 $\mu$ XCT data acquisition .....	27
4. Simulation methods .....	29
4.1 Geometrical parameters of the porous substrate .....	29
4.1.1 Tortuosity and diffusive simulation .....	29
4.1.2 Pore diameter evaluation .....	29
4.1.3 Permeability .....	30
4.1.4 Boundary condition .....	30
4.2 Different pressure simplifications of the BFM on flux .....	31
4.2.1 One dimensional exact solution of BFM .....	31
4.2.2 BFM – Constant pressure configurations .....	33
4.2.2.1 Surface constant pressure .....	33
4.2.2.2 Averaged constant pressure .....	34
4.3 Simulation procedure .....	35
5. Results and discussions .....	37

## Table of content

5.1 Sample parameter evaluation .....	37
5.1.1 As received sample parameter – permeation measurement .....	37
5.1.1.1 $\text{Ba}_{0.5}\text{Sr}_{0.5}\text{Co}_{0.8}\text{Fe}_{0.2}\text{O}_{3-\delta}$ (BSCF) .....	37
5.1.1.2 $\text{Ba}_{0.5}\text{Sr}_{0.5}(\text{Co}_{0.8}\text{Fe}_{0.2})_{0.97}\text{Zr}_{0.03}\text{O}_{3-\delta}$ (BSCF3Zr) .....	37
5.2 3D reconstruction of the XCT data .....	38
5.3 Computation/Evaluation of the geometrical parameters .....	41
5.3.1 Flow simulation .....	41
5.3.2 Diffusion simulation .....	42
5.3.3 Pore simulation .....	44
5.4 Evaluation of the characteristic thickness, $L_c$ .....	44
5.5 Effect of variation in support geometry on flux .....	45
5.5.1 Effect of the support pore diameter .....	45
5.5.1.1 Effect of transport terms in BFM (Viscous, Knudsen and binary diffusion term) on flux .....	47
5.5.1.2 Conclusion .....	49
5.5.2 Effects of pore diameters on partial pressure/pressure drop .....	49
5.5.2.1 Interfacial pressure .....	49
5.5.2.2 Pressure profiles .....	50
5.5.2.3 Conclusion .....	51
5.5.3 Effect of thickness and tortuosity factor of the porous support on flux .....	52
5.5.3.1 Conclusion .....	57
5.5.4 The effect of anisotropic scaling .....	57
5.5.4.1 Conclusion .....	59
5.6 Convective flow in the porous support .....	60
5.6.1 Conclusion .....	65
5.7 Comparison of freeze cast and tape cast porous structure .....	65
5.7.1 Effect of removing the nucleation zone .....	70
5.7.2 Conclusion .....	71
5.8 Outline for designing an optimized support microstructure .....	71
5.8.1 Operating conditions considered and procedure .....	72
5.8.1.1 Layer geometry and procedure .....	73
5.8.2 Variations in geometrical parameters of the layers .....	73
5.8.2.1 Effect of porosity, thickness and pore diameter on flux .....	73
5.8.2.2 Effect of tortuosity factor .....	76
5.8.3 Conclusion .....	79
5.9 One dimensional exact solution of BFM .....	80
5.9.1 Comparison of the oxygen flux from the simplifications .....	80
5.9.2 Relative and absolute flux differences between the different pressure simplifications and the exact solution .....	81
5.9.2.1 Support at the feed side .....	82
5.9.2.2 Support at the permeate side .....	84
5.9.3 Conclusion .....	85
6. Summary .....	87
7. Outlook .....	90
8. Reference .....	91
9. Acknowledgement .....	100
