# **Network architecture and heme-responsive gene regulation of the two-component systems HrrSA and ChrSA**

Marc Keppel

Schriften des Forschungszentrums Jülich  
Reihe Schlüsseltechnologien / Key Technologies

Band / Volume 203

---

ISSN 1866-1807

ISBN 978-3-95806-427-0

## Contents

<b>1. Summary</b> .....	<b>1</b>
<b>2. Scientific context and key results of this thesis</b> .....	<b>2</b>
2.1 Bacterial signal perception and transduction .....	2
2.1.1 Two-component signaling .....	3
2.2 Control of heme and iron homeostasis .....	8
2.2.1 The global relevance of iron .....	8
2.2.2 The regulation of iron homeostasis.....	9
2.2.3 Heme sensor systems.....	10
2.3 The heme-responsive two component systems HrrSA and ChrSA .....	14
2.3.1 Heme perception by the histidine kinases HrrS and ChrS .....	16
2.4 Heme-responsive gene regulation in <i>C. glutamicum</i> .....	18
2.4.1 Heme utilization vs. detoxification – a balancing act.....	19
2.5 Genome-wide profiling of the HrrSA regulon .....	23
2.5.1 Heme degradation and detoxification .....	24
2.5.2 The regulation of heme biosynthesis in <i>C. glutamicum</i> .....	24
2.5.3 The heme-dependent, HrrSA-mediated control of respiratory chain genes.....	27
2.5.4 Other targets of HrrSA.....	32
2.5.5 A glimpse into the unknown: HrrSA regulates several uncharacterized, cellular transport processes.....	34
2.5.6 The regulon of HrrSA and other global regulons: A comparison .....	38
2.6 Conclusion and outlook .....	40
<b>3. Publications and manuscripts</b> .....	<b>44</b>
3.1 Membrane Topology and Heme Binding of the Histidine Kinases HrrS and ChrS in <i>Corynebacterium glutamicum</i> . .....	45
3.2 Toxic but Tasty - Temporal Dynamics and Network Architecture of Heme-Responsive Two-Component Signalling in <i>Corynebacterium glutamicum</i> . .....	58
3.3 HrrSA Orchestrates a Systemic Response to Heme and Determines Prioritization of Terminal Cytochrome Oxidase Expression. ....	74

---

<b>4. References</b> .....	<b>93</b>
<b>5. Appendix</b> .....	<b>102</b>
5.1 Supplement “Membrane Topology and Heme Binding of the Histidine Kinases HrrS and ChrS” .....	108
5.2 Supplement “Toxic but Tasty - Temporal Dynamics and Network Architecture of Heme-Responsive Two-Component Signalling” .....	124
5.3 Supplement “HrrSA orchestrates a systemic response to heme and determines prioritization of terminal cytochrome oxidase expression” .....	145
