# Contents

1. Introduction .....	1
1.1. Working principle of HT-PEFCs .....	1
1.2. Literature review .....	3
1.3. Fundamentals of HT-PEFCs .....	9
1.4. Motivation and research goals .....	15
2. Experimental setup and procedures .....	17
2.1. HT-PEFC preparation .....	17
2.1.1. Preparation of gas diffusion electrodes .....	17
2.1.2. Membrane doping.....	18
2.1.3. HT-PEFCs single cell assembling .....	19
2.2. Electrochemical tests of HT-PEFCs .....	20
2.3. MEA Characterizations.....	21
2.3.1. Electron microscopy.....	21
2.3.2. Inductively coupled plasma-mass spectrometry (ICP-MS).....	22
2.3.3. Brunauer–Emmett–Teller (BET) measurement .....	23
2.4. Durability test.....	23
3. Effect of cathode morphology on the performance of HT-PEFCs .....	25
3.1. Cathodes prepared by spraying and doctor blade methods.....	25
3.1.1. Electrode morphology .....	25
3.1.2. Electrochemical tests .....	27
3.2. Cathodes prepared with different binders .....	29
3.2.1. Electrode morphology .....	29
3.2.2. Scanning Electrochemical Microscopy .....	30
3.2.3. Polarization curve.....	33
3.3. Effect of binder content on morphology and performance .....	34
3.3.1. Cathodes prepared by different contents of binder .....	34
3.3.2. BET measurement .....	35
3.3.3. SEM and EDX mapping.....	36
3.3.4. Comparison of electrochemical properties.....	37

3.4.	Summary .....	42
4.	Role of PTFE on HT-PEFC durability .....	45
4.1.	OCV operation .....	45
4.1.1.	Voltage-time and polarization curves .....	45
4.1.2.	Degradation rate comparison .....	46
4.1.3.	Electrochemical impedance spectroscopy .....	47
4.1.4.	Cyclic voltammetry .....	48
4.1.5.	Voltage loss contributions .....	49
4.1.6.	Recovery test .....	51
4.2.	Load cycling test .....	53
4.2.1.	Voltage-time curve .....	53
4.2.2.	ICP-MS measurement .....	54
4.3.	Summary .....	55
5.	Correlations between MEA parameters and electrochemical properties .....	57
5.1.	Experimental plan .....	57
5.2.	Cathodes with different parameters .....	58
5.3.	HT-PEFCs voltage .....	60
5.4.	Resistances .....	63
5.4.1.	Ohmic resistance .....	64
5.4.2.	Protonic resistance .....	66
5.4.3.	Charge transfer resistance .....	67
5.4.4.	Mass transport resistance .....	69
5.4.5.	Double layer capacitance .....	71
5.5.	Summary .....	72
6.	Study of Pt bands formation and Pt/C degradation in HT-PEFCs .....	75
6.1.	Operating procedure .....	75
6.2.	Electron microscopy characterizations .....	76
6.2.1.	SEM-EDX mapping analysis .....	76
6.2.2.	FIB/SEM measurement .....	78
6.3.	Mechanism of Pt band formation .....	82
6.4.	Electrochemical measurements .....	85

6.4.1.	Cyclic voltammetry .....	85
6.4.2.	Changes in cell resistance and performance.....	87
6.5.	Summary .....	89
7.	Comparison of degradation under various operating conditions.....	91
7.1.	Voltage-time curve.....	92
7.2.	FIB/SEM and EDX mapping analysis .....	94
7.2.1.	FIB/SEM characterization .....	94
7.2.2.	EDX mapping analysis .....	97
7.3.	ICP-MS measurement.....	105
7.4.	Electrochemical impedance spectroscopy .....	106
7.5.	Comparison of performance degradation.....	111
7.6.	Summary .....	114
8.	Overall discussion.....	115
9.	Conclusion.....	123
	Nomenclature .....	125
	Abbreviations .....	125
	Latin symbols .....	127
	Greek symbols.....	129
	Bibliography .....	131
	List of Figures .....	151
	List of Tables .....	157
	Publications.....	159
	Acknowledgments.....	161
