Studies of oxidation resistant tungsten alloys at temperatures of 1100 K to 1475 K

Felix Klein

Schriften des Forschungszentrums Jülich
Reihe Energie & Umwelt / Energy & Environment

Band / Volume 482

ISSN 1866-1793

ISBN 978-3-95806-444-7

Contents

1	Introduction	9
1.1	Nuclear fusion and its material requirements	9
1.2	Tungsten alloys	11
1.3	On oxidation mechanisms	15
1.4	Open questions and outline of the thesis	18
2	Experimental methods	20
2.1	Magnetron deposition	20
2.2	Powder mechanical alloying	21
2.3	Field assisted sintering technology (FAST)	21
2.4	Cutting and grinding	23
2.5	Carbon determination	23
2.6	Oxygen and nitrogen determination	24
2.7	Inductively coupled plasma optical emission spectrometry (ICP-OES) . . .	24
2.8	Weighting	24
2.9	Profilometry	25
2.10	X-ray diffraction (XRD)	25
2.11	Secondary ion mass spectroscopy (SIMS)	25
2.12	X-ray photoelectron spectroscopy (XPS)	26
2.13	Preparation using a focused ion beam (FIB)	26
2.14	Microscopy	27
	2.14.1 Scanning electron microscopy (SEM)	27
	2.14.2 Energy dispersive X-ray (EDX) spectroscopy	28
	2.14.3 Scanning transmission electron microscopy (STEM)	28
2.15	Atom probe tomography (APT)	29
2.16	Thermogravimetric analysis (TGA)	29
3	On oxidation and sublimation of tungsten (W)	32
3.1	Oxidation	32
	3.1.1 General understanding of the oxidation behavior of W	32
	3.1.2 Oxidation of W in different TGAs	35
3.2	Sublimation of W	37
4	On volatilization of chromium oxide	40
5	Oxidation of W-Cr-Y thin films	43
5.1	Pre-characterization of the thin films	43
5.2	Kinetics of the oxidation process of W-Cr-Y films	47
	5.2.1 Mass change due to oxidation	47

5.2.2	Microstructure of the formed oxide scale	48
5.2.3	Understanding and evaluation of the oxidation kinetics	51
6	Towards bulk W-Cr-Y alloys from FAST	55
6.1	Why bulk alloy materials are needed	55
6.2	From powder to the bulk sample: processing and understanding	56
7	Influence of production parameters on the oxidation of bulk samples	62
7.1	Influence of the sintering parameters on oxidation	62
7.2	Influence of the surface roughness on oxidation	69
7.3	Influence of the Y content on oxidation	71
7.4	Summary of the analyzed influences on oxidation	73
8	Long-term studies in dry and humid air	74
8.1	Oxidation and sublimation in dry air	74
8.2	Oxidation and sublimation at 1273 K in humid air	83
8.3	Influence of temperature on oxidation	88
9	Oxidation mechanisms of smart alloys	90
9.1	Oxidation mechanisms of thin films on a micro-scale	90
9.1.1	On diffusion of O	90
9.1.2	On diffusion of Cr	93
9.2	Oxidation mechanisms of smart alloys on a nano-scale	97
9.2.1	Scanning transmission electron microscopy on a thin film after oxidation	97
9.2.2	Atom probe tomography on a bulk sample after oxidation	99
9.2.3	Discussion on the effect of yttrium	103
10	Modeling of W-Cr-Y alloys	106
10.1	Introduction to high entropy alloys	106
10.2	Understanding of W-Cr-Y alloys using knowledge from HEA	109
11	Zr as an alternative active element to Y in the W-Cr alloy	114
11.1	W-Cr-Zr thin films	115
11.1.1	Pre-characterization of the films	115
11.1.2	Oxidation behavior of the films	117
11.1.3	On the influence of Zr	120
11.2	W-Cr-Zr bulk alloys	121
11.2.1	Pre-characterization of the sintered alloy	121
11.2.2	Oxidation behavior in dry atmosphere	123
12	Conclusions and outlook	125
12.1	Conclusions	125
12.2	Next steps towards smart alloys in a fusion power plant	128
12.2.1	Analytic understanding	128
12.2.2	Application in a fusion environment	128
12.2.3	Merging different advanced materials concepts	129
12.2.4	Up-scaling and industrialization	130
12.3	Aluminum as an alloying element?	131

13 Bibliography	132
List of Figures	142
List of Tables	149
Acknowledgment	150
Lebenslauf	153
Curriculum vitae	155
