Contents

Contents	9
List of Figures	12
List of Tables	13
1. Introduction	17
2. Wetlands	17
2.1. An Introduction to Wetlands and their Role in Global Climate Regulation .	17
2.2. Soil Properties	19
2.3. The Carbon Cycle	20
2.3.1. Carbon Sequestration	20
2.3.2. Aerobic and Anaerobic Carbon Turnover Processes	22
2.4. The Nitrogen Cycle	24
2.5. Gaseous Transport	26
2.6. GHG Emissions and Climate Change	27
2.7. Land-Use Change and Effects on the Ecosystem	30
2.8. GHG Measurements in Africa	32
3. Research Objectives	35
4. Data Quality Management System	36
4.1. Introduction	36
4.1.1. Greenhouse Gas Flux Calculation	36
4.1.2. Need for Data Quality Management System	37
4.1.3. Removal of Outliers	38
4.2. Methods	39
4.2.1. Field Measurements	39
4.2.2. Sample Analysis	40
4.3. Results	40
4.3.1. Data Quality Management System	40
4.3.2. Application	46
4.4. Discussion	46
4.4.1. Evaluation of the DQMS	46
4.4.2. Risk of Over- or Underestimation	49
4.4.3. Linear vs. non-linear flux calculation	50
4.5. Conclusion	52

5. GHG Emissions from Wetland Rice Fields in Uganda	54
5.1. Introduction	54
5.1.1. Wetlands and Agriculture	54
5.1.2. Carbon Cycle in Wetlands	55
5.1.3. Effects of Land-Use Change on GHG Emissions	56
5.1.4. GHG Research in Sub Saharan Africa	56
5.1.5. Wetlands in Sub-Saharan Africa	57
5.2. Methods	57
5.2.1. Central Field Trial	57
5.2.2. GHG Sampling and Laboratory Analysis	59
5.2.3. Chamber Design	59
5.2.4. Gas-Pooling and Vial Flushing	61
5.2.5. Data Quality Management and Flux Calculation	61
5.2.6. Soil Sampling and Laboratory Analysis	62
5.2.7. Meteorological Data and Soil Moisture	63
5.2.8. Calculation of GWPI and GHGI	63
5.2.9. Data Processing and Statistical Analysis	63
5.3. Results	64
5.3.1. Methane	64
5.3.2. Carbon Dioxide	65
5.3.3. Nitrous Oxide	65
5.3.4. Nitrate and Ammonium	66
5.3.5. GWP and GWPI	67
5.4. Discussion	67
5.4.1. Land-Use Change	68
5.4.2. Methane	68
5.4.3. Carbon Dioxide	69
5.4.4. Nitrous Oxide	70
5.4.5. Relationship of Mineral Nitrogen Dynamics and N ₂ O fluxes	71
5.4.6. GWP and GWPI	72
5.5. Conclusion	73
6. GHG Emissions from Floodplain Rice Fields in Tanzania	83
6.1. Introduction	83
6.2. Methods	85
6.2.1. Research Area	85
6.2.2. Study Design	85
6.2.3. GHG Sampling and Laboratory Analysis	86
6.2.4. Chamber Construction	86
6.2.5. Data Quality Management and Flux Calculation	87
6.2.6. Soil Sampling and Laboratory Analysis	88

6.2.7. Meteorological Data and Soil Moisture	88
6.2.8. Calculation of GWPI and GHGI	89
6.2.9. Data Processing and Statistical Analysis	89
6.3. Results	90
6.3.1. Methane	90
6.3.2. Carbon Dioxide	90
6.3.3. Nitrous Oxide	91
6.3.4. Nitrate and Ammonium	92
6.3.5. GWP and GWPI	93
6.4. Discussion	93
6.4.1. Methane	93
6.4.2. Carbon Dioxide	94
6.4.3. Nitrous Oxide	95
6.4.4. Nitrate and Ammonium	96
6.4.5. GWP and GWPI	97
6.5. Summary	98
7. Final Conclusions	107
7.1. DQMS	107
7.2. Wetland Types	107
7.3. Types of Land Use	109
7.4. Hydrological Wetland Position	110
7.5. Agricultural Treatment Methods	111
References	112
A. Appendix	126
Acknowledgements	143
