Detection and Statistical Evaluation of Spike Patterns in Parallel Electrophysiological Recordings

Pietro Quaglio

Schriften des Forschungszentrums Jülich
Reihe Schlüsseltechnologien / Key Technologies

Band / Volume 217

ISSN 1866-1807

ISBN 978-3-95806-468-3

Contents

1	Introduction	13
1.1	Neuron and spikes	13
1.2	Spike patterns: temporal and rate coding	14
1.2.1	Rate coding	16
1.2.2	Temporal coding	17
1.3	Beyond synchronization: Spatio-Temporal Patterns	19
1.4	Detection Spatio-Temporal Patterns in Massively Parallel Spike Trains	21
1.5	Reproducibility and Comparability	22
2	Detection of Spatio-Temporal Spike Patterns in Massively Parallel Spike Trains using Formal Concept Analysis	23
2.1	Introduction	23
2.2	Methods	24
2.2.1	FCA on spike data	24
2.2.2	Ground truth data generation	25
2.3	Results	26
2.3.1	Independent data	26
2.3.2	Performance of pattern detection	27
2.3.3	Runtime behavior of the FCA Algorithm	30
2.4	Discussion	30
3	Extending SPADE to Spatio-Temporal Spike Patterns	33
3.1	Introduction	33
3.2	Methods	34
3.2.1	Extracting non trivial patterns from large-size data	34
3.2.2	Filtering patterns by stability	35
3.2.3	Filtering patterns by statistical significance	38
3.3	Results	40
3.3.1	Computational efficiency	40
3.3.2	Stochastic models for validation	41
3.3.3	False positives and false negatives	43
3.3.4	Performance of approximate stability	45
3.3.5	Validation on artificial data	48
3.3.6	Validation of SPADE on inhomogeneous data	52
3.3.7	Summary of the Validation Results	54
3.4	Discussion	54

4	Detection and Analysis of Spatio-Temporal Patterns of Multiple Time Durations - SPADE extended	57
4.1	Introduction	57
4.2	Extension of SPADE	58
4.2.1	3-dimensional Pattern Spectrum	58
4.2.2	Artificial Data	60
4.2.3	Analysis of artificial data	61
4.2.4	FP/FN performance	63
4.3	Analysis of Experimental Data	67
4.3.1	Reach-to-Grasp Data	67
4.3.2	Parameters of the SPADE Analysis	70
4.3.3	Results	71
4.4	Software and Workflow	72
4.5	Discussion	74
5	Review of Methods for Identification of Spike Patterns in Massively Parallel Spike Trains	77
5.1	Introduction	77
5.2	Models for parallel correlated spike trains	77
5.2.1	Population synchronization	78
5.2.2	Pairwise synchronization	78
5.2.3	Synchronous Spike Patterns	79
5.2.4	Spatio-temporal Patterns	79
5.2.5	Sequences of synchronous spike events	79
5.2.6	Point Processes models for Correlated Spike Trains	80
5.3	Higher-order correlation analysis methods	80
5.3.1	Methods to detect population synchronization	82
5.3.2	Methods for spike pattern detection	89
5.4	Method comparison	100
5.4.1	Population Synchronization	100
5.4.2	Pairwise Synchronization	102
5.4.3	Synchronous Spike Patterns	103
5.4.4	Spatio-temporal patterns	104
5.4.5	Sequences of synchronous spike events	104
5.5	Discussion and Conclusions	105
6	Summary and Discussion	109
