Tomographic observations of gravity waves with the infrared limb imager GLORIA

Isabell Krisch

Schriften des Forschungszentrums Jülich
Reihe Energie & Umwelt / Energy & Environment

Band / Volume 496

ISSN 1866-1793

ISBN 978-3-95806-481-2

Contents

1	Introduction	1
2	Gravity wave theory	13
2.1	Dispersion relation	13
2.2	Polarisation relations	19
2.3	Wave propagation	21
2.4	Sources	25
2.4.1	Orography	25
2.4.2	Non-orographic sources	31
2.4.2.1	Convection	31
2.4.2.2	Jets and fronts	33
3	Data acquisition	35
3.1	Aircraft measurement campaign	35
3.2	Gimballed Limb Observer for Radiance Imaging of the Atmosphere (GLORIA)	40
3.2.1	Measurement concept	40
3.2.2	Level 2 processing	44
3.2.2.1	Forward model and measurement simulator	45
3.2.2.2	Retrieval	47
3.2.2.3	Diagnostics	50
3.3	Scientific flight planning	52
3.4	Atmospheric Infrared Sounder (AIRS)	54
3.5	Analysis and reanalysis model data	57
4	Wave characterisation	59
4.1	Scale separation	59

4.2	Spectral analysis	65
5	The measurement sensitivity of GLORIA to gravity waves	69
5.1	Concept of the sensitivity study	70
5.2	Full angle tomography (FAT)	73
5.3	Limited angle tomography (LAT)	76
5.3.1	Dependence on horizontal and vertical wavelengths	76
5.3.2	Dependence on wave orientation	79
5.4	Comparison of LAT and FAT for a real measurement case .	84
5.5	Conclusions	88
6	The importance of 3-D wave propagation – a case study observed above Iceland on 25 January 2016	91
6.1	Synoptic situation	92
6.2	GLORIA measurement results	94
6.3	Wave characterisation	97
6.4	Wave source and propagation	101
6.5	Comparison to AIRS measurements	107
6.6	Conclusions	108
7	The importance of non-linear processes – a case study observed above Scandinavia on 28 January 2016	111
7.1	Synoptic situation	113
7.2	GLORIA measurement results and wave characterization .	114
7.3	Wave sources and propagation	121
7.4	Comparison to AIRS measurements	124
7.5	Conclusions	128
8	Summary and outlook	131
A	Error analysis of the ray tracing calculations	137
B	Impact of black-body inhomogeneity on the retrieval re- sults of GLORIA	143
B.1	Radiometric calibration	143
B.2	Impact of black-body temperature uncertainty on radiances	145

B.3	Concept of the used Monte Carlo approach	147
B.4	Study results and discussion	149
