

Aquisition of temporally and spatially highly resolved data sets of relevant trace substances for model development and model evaluation purposes using a mobile measuring laboratory

D. Klemp, R. Wegener, R. Dubus, U. Javed

Energie & Umwelt / Energy & Environment

Band / Volume 497

ISBN 978-3-95806-465-2

ISBN 978-3-95806-465-2

Contents

1	Task definition	4
2	Conditions for project implementation.....	4
2.1	Institution.....	5
2.2	Mobile measuring laboratory (MobiLab)	7
2.3	The gas chromatography system	11
3	Planning and execution of the project.....	15
3.1	Work-package 210: Preparation of IOPs and intercalibrations	16
3.2	Work-package 220 and 230: IOPs in Berlin and Stuttgart	17
3.3	Work-package 310: Development and testing of measurement concepts.....	17
3.4	Work-package 320: Development and testing of analysis concepts	18
3.5	Work-package 330: Data integration platform	19
3.6	Work-package 410: Application for model analysis	19
3.7	Work-package 420: Model validation	19
3.8	Work-package 430: Applications: Test vehicle emission factors	20
4	Scientific and technical status	21
5	Cooperation with other subprojects	23
5.1	Measurement comparisons for data harmonisation.....	23
5.2	Support for the studies carried out	29
5.2.1	IOPs in Berlin	29
5.2.2	IOPs in Stuttgart.....	29
6	Results	30
6.1	Observations during the IOPs (work-packages 210 – 330)	30
6.1.1	Berlin.....	30
6.1.2	Stuttgart	34
6.1.3	NO _x Contribution of a City	40

6.1.4	Assessment of contribution of traffic emissions	40
6.2	Monitoring traffic emissions (work-package 430)	45
6.2.1	NO _x emission of the current vehicle fleet by means of tunnel studies	45
6.2.2	N ₂ O-Emissions	54
6.2.3	NH ₃ -emissions from chasing experiments	60
6.3	VOCs as presurcors for ozone production	64
6.3.1	Modeling summer photo-oxidant formation with MCM-3.3	64
6.3.2	The reactivity concept	66
6.3.3	Invariance of the VOC profile from traffic	68
6.3.4	Local O ₃ formation of current trace gas mixes in the Berlin area	74
6.3.5	Seasonal dependency of biogenic contributions to the VOC mix	78
6.4	Further usability of the results	79
7	Appendix	82
7.1	Current VOCs road-traffic-mixture	82
7.2	Comparison of VOC composition of a diesel vehicle with the current Heslacher tunnel mix	87
7.3	Results of TP6 reference measurements for the validation periods of PALM-4U in Berlin and Stuttgart	89
7.3.1	Berlin (VALR01 , VALR02, VALR06)	89
7.3.2	Stuttgart (VALR03 , VALR04)	93
8	Literature	96
9	List of Figures	104
10	List of Tables	109
11	List of Abbreviations	110
