Contents

1	Introduction	1
1.1	Composition and structure of the atmosphere	1
1.2	The mesosphere and lower thermosphere (MLT)	3
1.3	Atomic oxygen and hydrogen in the MLT	5
1.4	Atmospheric waves and temperature observations in the MLT . .	9
1.5	Remote sensing techniques and scientific applications	13
2	Atmospheric nightglow modeling	15
2.1	Hydroxyl nightglow emission	16
2.1.1	OH emission characterization	17
2.1.2	OH nightglow photochemistry	20
2.1.3	Volume emission rate of OH nightglow	23
2.1.4	Rotational structure of OH emission	24
2.1.5	OH nightglow observations	26
2.2	Oxygen atmospheric band emission	29
2.2.1	O ₂ A-band nightglow photochemistry	30
2.2.2	Volume emission rate of O ₂ A-band nightglow	33
2.2.3	The rotational structure of the O ₂ A-band	34
2.2.4	Radiative transfer of the O ₂ A-band	35
2.3	Methodology for the retrieval of atomic oxygen and hydrogen .	37
2.4	Methodology for the retrieval of atmospheric temperature	39
3	Inverse modeling	43
3.1	Inverse problem	44
3.2	Regularization	45
3.3	Minimization	46

3.4	Diagnostics	47
4	Atomic oxygen and hydrogen derived from GOMOS OH airglow measurements	51
4.1	Measurements and data processing	52
4.1.1	GOMOS on Envisat	52
4.1.2	Data selection and resampling	53
4.1.3	Retrieval setup	58
4.2	Retrieval results of atomic oxygen	59
4.2.1	Atomic oxygen abundances	59
4.2.2	Error analysis	60
4.2.3	Spatial and temporal analysis	62
4.2.4	Comparison with SCIAMACHY data	68
4.2.5	Comparison with other datasets	74
4.3	Retrieval results of atomic hydrogen	76
4.3.1	Atomic hydrogen abundances	76
4.3.2	Error analysis	77
4.3.3	Spatial and temporal analysis	78
4.3.4	Comparison with other datasets	83
5	Atmospheric temperature derived from GRIPS-F OH airglow measurements	87
5.1	Measurements and data processing	88
5.1.1	Ground-based GRIPS-F instrument	88
5.1.2	Data processing	89
5.1.3	Retrieval setup	90
5.2	Retrieval results of atmospheric temperature	91
5.2.1	Atmospheric temperature	91
5.2.2	Error analysis	92
5.2.3	Comparison with the three peak retrieval method	94
6	Atmospheric temperature derived from AtmoSHINE O₂ A-band measurements	97
6.1	In-orbit experiments and data processing	98
6.1.1	AtmoSHINE on Hongyun satellite	98
6.1.2	Instrument operation and performance	100
6.1.3	Data transmission and processing	103

6.2	Characterization of processed spectra	109
6.2.1	Geographical distribution	110
6.2.2	SNR analysis	110
6.2.3	In-orbit visibility calibration	111
6.3	Result evaluation	114
6.3.1	Retrieval setup	114
6.3.2	Derived temperature	114
6.3.3	Error analysis	116
6.4	Comparison of the results	118
6.4.1	Comparison of limb radiance with OSIRIS	118
6.4.2	Comparison of temperature with SABER measurements	119
7	Summary	123
A	Appendix	127
A.1	Chemical reaction parameters in OH airglow modeling	127
A.2	Collisional rate coefficients in OH airglow modeling	128
A.3	Fitting of collisional rate coefficients in OH airglow modeling for $v=8$	129
A.3.1	Selection of the collisional rate coefficients for OH($v=8$)	129
A.3.2	Fitting of the collisional rate coefficients for OH($v=8$) .	131
A.4	O ₂ A-band nightglow modeling parameters	133
A.5	Multiple linear regression analysis of atomic oxygen for different cases	134
A.6	GRIPS-F dark current correction algorithm	137
A.7	GRIPS-F instrument line shape function	139
A.8	Three peak method for OH(3-1) rotational temperature retrieval	142
A.9	AtmoSHINE in-orbit tests	144
	Acknowledgements	149
	Acronyms	151
	List of Figures	155
	List of Tables	167
	Bibliography	169
