<b>Declaration of Authorship</b>	<b>iii</b>
<b>Abstract</b>	<b>vii</b>
<b>Zusammenfassung</b>	<b>xi</b>
<b>Acknowledgements</b>	<b>xvii</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Limitations of Forest Hydrological Research . . . . .	4
1.2 Thesis Objectives and Structure . . . . .	7
<b>2 State-of-the-Art in Hydrological Land Use Change Studies in the Temperate Forest Biome</b>	<b>9</b>
2.1 The Temperate Forest Biome . . . . .	11
2.2 Water Balance Components . . . . .	12
2.3 Discharge: Measurement Setup and Data Analysis Approaches	13
2.3.1 Annual Discharge Analysis . . . . .	13
2.3.2 Intra-Annual Discharge Analysis . . . . .	17
2.3.3 Long-Term Discharge Analysis . . . . .	20
2.3.4 Spatial Extent of Experimental Discharge Studies . . .	22
2.4 Evapotranspiration: Measurement Setup and Data Analysis Approaches . . . . .	25
2.4.1 Spatial and Temporal Coverage of Evapotranspiration Measurements . . . . .	25
2.4.2 Regional to Global Evapotranspiration Analysis . . . .	27
2.4.3 Small Scale Evapotranspiration Analysis . . . . .	29
2.5 Soil Moisture: Measurement Setups and Data Analysis Approaches . . . . .	33
2.5.1 Spatial and Temporal Extent of Soil Moisture Measurements . . . . .	34
2.5.2 Profile-Based Soil Moisture Observations . . . . .	36
2.5.3 Spatiotemporal Soil Moisture Patterns: 3D - 4D Analyses	37

2.5.4	Subsurface Water Movement and Soil Properties . . . . .	40
2.6	Modelling Concepts to Analyse Land Use Change . . . . .	42
2.6.1	Study Area Characteristics and Case Description . . . . .	43
2.6.2	Hydrological Models . . . . .	56
2.6.3	Calibration and Validation . . . . .	63
2.6.4	Predictive Uncertainty (Single Model Studies) . . . . .	79
2.6.5	Ensemble Modelling and Model Inter-Comparison . . . . .	81
2.6.6	Model Outcome Comparison . . . . .	84
2.7	General Conclusion . . . . .	88
<b>3</b>	<b>The TERENO Test Site Wüstebach</b>	<b>91</b>
3.1	Site Characterization . . . . .	91
3.2	Measurement Setup . . . . .	94
3.2.1	Discharge . . . . .	99
3.2.2	Precipitation . . . . .	100
3.2.3	Potential Evapotranspiration . . . . .	100
3.2.4	Actual Evapotranspiration . . . . .	101
3.2.5	Soil Moisture . . . . .	104
3.3	Brief Overview of Previous Work in the Wüstebach Catchment	105
<b>4</b>	<b>Measured Changes in Spatiotemporal Patterns of Hydrological Response after Partial Deforestation</b>	<b>109</b>
4.1	Introduction . . . . .	109
4.2	Materials and Methods . . . . .	110
4.2.1	The Selected Dataset . . . . .	110
4.2.2	The Budyko Framework . . . . .	110
4.2.3	Analysis of Intra-Annual Variability in Evapotranspiration and Discharge . . . . .	111
4.2.4	Spatiotemporal Soil Moisture Characteristics . . . . .	112
4.3	Results and Discussion . . . . .	113
4.3.1	Changes in the Annual Water Balance . . . . .	113
4.3.2	Analysing Annual Changes Using the Budyko Framework . . . . .	115
4.3.3	Changes at the Intra-Annual Time Scale . . . . .	118
4.3.3.1	Evapotranspiration . . . . .	118
4.3.3.2	Discharge . . . . .	121
4.3.3.3	Soil Water Storage . . . . .	123
4.4	Conclusions . . . . .	128

<b>5 Spatial and Temporal Occurrence of Preferential Flow in a Forested Headwater Catchment</b>	<b>131</b>
5.1 Introduction . . . . .	131
5.2 Materials and Methods . . . . .	132
5.2.1 Conceptual Model . . . . .	132
5.2.2 Soil Moisture Measurements . . . . .	133
5.2.3 Precipitation and Event Delineation . . . . .	134
5.2.4 Event and Soil Characteristics . . . . .	134
5.2.5 Characterizing Soil Moisture Response . . . . .	136
5.3 Results and Discussion . . . . .	139
5.3.1 Event Delineation . . . . .	139
5.3.2 Flow Classification for Single Events . . . . .	140
5.3.3 Spatial Frequency of Preferential Flow Occurrence . . . . .	143
5.3.4 Event-Based Analysis of Preferential Flow Occurrence	145
5.3.5 Combining Spatial and Temporal Components of Preferential Flow Occurrence . . . . .	150
5.4 Conclusions . . . . .	151
<b>6 Spatiotemporal Changes in Sequential and Preferential Flow Occurrence after Partial Deforestation</b>	<b>153</b>
6.1 Introduction . . . . .	153
6.2 Methodology . . . . .	154
6.2.1 Measurement Setup . . . . .	154
6.2.2 Event Delineation and Soil Moisture Response . . . . .	155
6.3 Results and Discussion . . . . .	157
6.3.1 Time Series of Precipitation and Soil Moisture . . . . .	157
6.3.2 Analysis of Differences in Sensor Response due to Deforestation . . . . .	159
6.3.3 Event Conditions: Antecedent Moisture and Precipitation . . . . .	162
6.3.4 Implications of the Presented Results . . . . .	166
6.4 Conclusions . . . . .	167
<b>7 Distributed Hydrological Modelling of Partial Deforestation in a Small Headwater Catchment</b>	<b>169</b>
7.1 Introduction . . . . .	169
7.2 Methodology . . . . .	170
7.2.1 TerrSysMP . . . . .	170
7.2.1.1 ParFlow Model . . . . .	171

7.2.1.2 CLM 3.5 Model . . . . .	173
7.2.1.3 Model Coupling . . . . .	175
7.2.2 Model Setup of ParFlow-CLM for the Wüstebach Catchment . . . . .	176
7.2.2.1 General Setup . . . . .	176
7.2.2.2 Parking Lot Test . . . . .	180
7.2.2.3 Local Sensitivity Analysis for Manning's Roughness Coefficient . . . . .	181
7.2.2.4 Plant Parameterization before the Deforestation . . . . .	182
7.2.2.5 Plant Parameterization after the Partial Deforestation . . . . .	186
7.2.3 Model Evaluation . . . . .	187
7.3 Results and Discussion . . . . .	190
7.3.1 Annual Water Balance . . . . .	190
7.3.2 Daily Discharge . . . . .	192
7.3.3 Actual Evapotranspiration . . . . .	195
7.3.4 Soil Moisture . . . . .	200
7.4 Conclusions . . . . .	206
<b>8 Synthesis: Towards an Improved Ecohydrological Understanding of Partial Deforestation Measures</b>	<b>209</b>
8.1 New Ecohydrological Insights from the Wüstebach Dataset . . . . .	209
8.2 New Ecohydrological Insights from TerrSysMP Model Predictions . . . . .	213
<b>A Reproducibility and Data Availability</b>	<b>217</b>
A.1 Data Availability and GitHub Data Repository . . . . .	217
A.2 Adjusted Plant Parameterization CLM 3.5 . . . . .	217
<b>Bibliography</b>	<b>221</b>
