Contents

Abstract	i
1 Introduction	1
1.1 The Asian Monsoon Anticyclone	1
1.2 Measuring atmospheric trace gases with Chemical Ionization Mass Spectrometry	3
1.3 Tropospheric chemistry background	4
1.4 Scientific questions and thesis structure	5
2 Fundamentals of the instrumentation	7
2.1 Chemical Ionization Mass Spectrometry	7
2.2 Chemical ionisation within FunMass	8
2.2.1 DBD ion source, ion-molecule reaction and ion funnel	8
2.2.2 Standard-DBD ion source	11
2.2.3 Concentric-DBD ion source	12
2.3 Ion transfer stages and the time-of-flight mass analyser	13
2.4 Quantitative analysis	16
2.4.1 Calibration	16
2.4.2 Data analysis for airborne measurements	17
2.4.3 Data analysis for chamber measurements	19
3 In-situ measurements with FunMass in the UTLS	25
3.1 The FunMass aircraft inlet system	25
3.2 Flight planning	27
3.3 In-situ data interpretation	29
3.3.1 In situ HNO ₃ and HCN data	29
3.4 FunMass measurements <i>vs.</i> satellite observations	30
3.4.1 EOS Aura MLS HNO ₃	30
3.4.2 ACE-FTS HCN	33
3.5 Tracer-tracer correlations	34
3.6 Conclusions	37
4 Trajectory studies on convective influence and air mass origins	41
4.1 Model descriptions	41
4.2 Convective signatures along flights	45
4.2.1 F6	45
4.2.2 F7	47
4.3 Air mass origins	48
4.3.1 F6	48
4.3.2 F7	50
4.3.3 General features	52
4.4 Enhanced HCN in the lower stratosphere	52
4.5 Discussion and conclusions	56

5	Measurements with FunMass in a chamber study	59
5.1	NO ₃ -initiated oxidation of isoprene	59
5.2	The SAPHIR chamber and FunMass sampling system	61
5.3	Course of the campaign	64
5.4	HNO ₃ production in the gas phase	67
5.4.1	Background HNO ₃ measurements in the chamber	67
5.4.2	Test with a low amount of C ₅ H ₈ in the chamber	69
5.4.3	Tests with high amounts of NO ₂ and C ₅ H ₈	70
5.5	HNO ₃ production with seed aerosols in the chamber	72
5.5.1	Indirect and direct HNO ₃ production from NO ₂ -O ₃ -H ₂ O and N ₂ O ₅	72
5.5.2	Nighttime and daytime chemistry combined experiment	74
5.6	Detection of organic nitrates	76
5.7	Conclusion	81
6	Conclusions and perspectives	83
6.1	Conclusions	83
6.2	Perspectives	84
	Bibliography	87
	Acknowledgements	99
A	Additional table and figures	101
A.1	DBD ion source	101
A.2	StratoClim campaign	102
A.3	NO ₃ -isoprene campaign	105
