Table of contents

1	SUMMARY.....	1
1.1	Summary English	1
1.2	Summary German.....	2
2	SCIENTIFIC CONTEXT AND KEY RESULTS OF THIS THESIS.....	2
2.1	<i>Corynebacterium glutamicum</i>	5
2.1.1	Characteristics of <i>C. glutamicum</i>	5
2.1.2	Substrates that can be used as sole carbon and nitrogen source by <i>C. glutamicum</i>	5
2.1.3	Products produced using <i>C. glutamicum</i>	6
2.1.4	Nitrogen metabolism and regulation in <i>C. glutamicum</i>	8
2.1.5	Gene regulation in <i>C. glutamicum</i>	10
2.2	γ-Aminobutyric acid (GABA) production in <i>C. glutamicum</i>	11
2.3	GABA catabolism	13
2.4	Regulation of GABA metabolism	14
2.4.1	Regulators of GABA metabolism.....	14
2.4.2	Regulators belonging to the PucR family	15
2.5	Aims of this thesis	16
2.6	Key results	16
2.6.1	Investigation of carbon metabolism in <i>C. glutamicum</i>	16
2.6.2	GABA can be used as sole carbon and nitrogen source in <i>C. glutamicum</i>	17
2.6.3	GabR is a regulator that activates the GABA metabolic pathway	17
2.6.4	GabR is a octamer.....	18
2.6.5	Determination of the GabR binding site(s) in the <i>gabTDP</i> promoter region	18
2.6.6	Investigation of reasons for the inhibitory effect of ammonium on growth with GABA	19
2.7	Conclusions and outlook	20
2.8	References	21
3	SEARCH FOR NEW CARBON SOURCES OF <i>CORYNEBACTERIUM GLUTAMICUM</i>	31
3.1	Substrates known to be used as carbon sources by <i>C. glutamicum</i>	31

Table of contents

3.2	Alternative carbon sources used by engineered <i>C. glutamicum</i> strains	34
3.3	Potential new carbon sources for <i>C. glutamicum</i>	35
3.4	References	40
4	γ -AMINO BUTYRATE (GABA) UTILIZATION AND ITS REGULATION BY GABR IN <i>CORYNEBACTERIUM GLUTAMICUM</i>	45
5	SUPPLEMENTARY DATA	85
	DANKSAGUNG.....	110
	ERKLÄRUNG.....	111
