# Contents

<b>Abstract</b>	<b>iii</b>
<b>Kurzfassung</b>	<b>vii</b>
<b>1 Introduction</b>	<b>1</b>
<b>2 Fundamentals</b>	<b>5</b>
2.1 Fundamentals of optics . . . . .	5
2.1.1 Maxwell equations . . . . .	5
2.1.2 Electromagnetic plane waves . . . . .	7
2.1.3 Refractive index . . . . .	9
2.1.4 Absorption . . . . .	10
2.1.5 Evanescent waves . . . . .	11
2.2 Beyond diffraction limit: fundamentals of near-field optics . . . . .	16
2.2.1 Diffraction limit . . . . .	16
2.2.2 Angular spectrum representation . . . . .	18
2.2.3 Near-field optics and SNOM . . . . .	19
2.3 Fundamentals of the solar cell . . . . .	21
2.3.1 Basics of silicon solar cell . . . . .	22
2.3.2 Absorption coefficients of silicon materials . . . . .	24
2.3.3 Recombination mechanisms . . . . .	25
2.3.4 Light trapping . . . . .	27
<b>3 Methods</b>	<b>29</b>
3.1 General setup for the SNOM photocurrent measurement . . . . .	29
3.2 Main components of the a-SNOM . . . . .	31
3.3 Extraction and processing of the photocurrent signal . . . . .	36

## Contents

3.4 FDTD simulation . . . . .	37
3.4.1 FDTD simulation tool . . . . .	39
<b>4 Investigation of the flat <math>\mu</math>c-Si:H and the a-Si:H thin-film solar cells</b>	<b>43</b>
4.1 SNOM photocurrent measurement results . . . . .	43
4.2 Domain configuration and parameters for the FDTD simulations . . . . .	47
4.3 FDTD simulation results and comparison with the measurements . . . . .	51
4.4 Effect of the light polarization on the local light coupling . . . . .	56
4.5 Possible origin of the topography-dependent local light coupling efficiency . . . . .	64
4.6 Conclusion . . . . .	68
<b>5 Investigation of the poly-Si LPC thin-film solar cell</b>	<b>71</b>
5.1 Flat poly-Si LPC thin-film solar cell . . . . .	71
5.2 SNOM photocurrent measurement results . . . . .	73
5.3 Domain configuration and results of the FDTD simulations . . . . .	76
5.4 Basic principles of the electrical simulations . . . . .	83
5.5 Results and discussion of the electrical simulations . . . . .	86
5.6 Conclusion . . . . .	91
<b>6 Investigation of the randomly textured <math>\mu</math>c-Si:H thin-film solar cell</b>	<b>93</b>
6.1 SNOM photocurrent measurement results . . . . .	94
6.2 Domain configuration and results of the FDTD simulations . . . . .	100
6.3 FDTD Simulation results and comparison with the measurements . . . . .	105
6.4 Discussion of the nature of the electrical defects and their impact . . . . .	108
6.5 Conclusion . . . . .	111
<b>7 Summary and Outlook</b>	<b>113</b>
7.1 Summary . . . . .	113
7.2 Outlook . . . . .	116
<b>Bibliography</b>	<b>119</b>
<b>List of Publications</b>	<b>141</b>
