Table of Contents

Abstract	I
Zusammenfassung	II
Table of Contents	III
Chapter 1	
General introduction	1
1.1 Root temperature and its influences	1
1.1.1 Plant growth and biomass	2
1.1.2 Plant physiology	3
1.1.3 Food quality	7
1.2 Horticultural model crops	13
1.2.1 Cocktail tomato	13
1.2.2 Chinese broccoli	17
1.3 Objectives and hypothesis	23
1.4 Thesis outline	23
Chapter 2	
Effects of root cooling on plant growth and fruit quality of cocktail tomato during two consecutive seasons	26
2.1 Introduction	27
2.2 Materials and Methods	30
2.2.1 Plant material and growth conditions	30
2.2.2 Experimental design and root temperature management	31
2.2.3 Harvest and sample preparation	32
2.2.4 Sugar quantification	33
2.2.5 Carotenoids determination	34
2.2.6 Analysis of organic acid	35
2.2.7 Determination of carbon, nitrogen, sulfur and other elements	36
2.2.8 Statistical analysis	37
2.3 Results and discussion	37
2.3.1 Greenhouse microenvironment parameters	37
2.3.2 Influence of root cooling on plant growth and fruit yield	38
2.3.3 Influence of root cooling on bioactive compounds	42
2.3.4 Influence of root cooling on elements concentrations	48
Chapter 3	
Effects of root temperature on the plant growth and food quality of Chinese broccoli (<i>Brassica oleracea</i> var. <i>alboglabra</i> Bailey)	53
3.1 Introduction	54
3.2 Materials and Methods	56

3.2.1 Plant materials and growth conditions	56
3.2.2 Root temperature setup	57
3.2.3 Harvest and sample preparation	57
3.2.4 Elemental analysis.....	58
3.2.5 Soluble sugars, total chlorophyll and starch quantification.....	59
3.2.6 Glucosinolates analysis.....	60
3.2.7 Statistical analysis	62
3.3 Results.....	63
3.3.1 Greenhouse climate conditions	63
3.3.2 Effects of root temperature on plant growth	63
3.3.3 Effects of root temperature on elemental composition	65
3.3.4 Effects of root temperature on soluble sugars, total chlorophyll and starch	68
3.3.5 Effects of root temperature on glucosinolates	70
3.4 Discussion	72

Chapter 4

Effects of short-term root cooling before harvest on yield and food quality of Chinese broccoli (*Brassica oleracea* var. *alboglabra* Bailey)..... 79

4.1. Introduction.....	80
4.2. Materials and Methods	82
4.2.1 Plant materials and experimental setup.....	82
4.2.2 Evaluation of photosynthesis, transpiration, stomatal conductance and leaf temperature	83
4.2.3 Soluble sugar, total chlorophyll and starch analysis	84
4.2.4 Mineral elements quantification.....	85
4.2.5 Glucosinolates analysis.....	85
4.2.6 Statistical analysis	86
4.3 Results.....	86
4.3.1 Greenhouse climate conditions	86
4.3.2 Biomass and yield	87
4.3.3 Net photosynthesis, transpiration, stomatal conductance and leaf temperature	88
4.3.4 Soluble sugars, starch and total chlorophyll.....	88
4.3.5 Glucosinolates.....	89
4.3.6 Mineral elements.....	92
4.4 Discussion	94

Chapter 5

Taste of cocktail tomato (*Lycopersicum esculentum* Mill.) as influenced by lowering root temperature.. 102

5.1 Introduction.....	103
5.2 Materials and Methods	104
5.2.1 Genarl treatment conditions	104
5.2.2 Sensory evaluations.....	104
5.2.3 Statistical analysis	106
5.3 Results and Discussion.....	106
5.3.1 Descriptive analysis	106
5.3.2 Preference testing.....	109

Chapter 6

Conclusion and outlook..... 111

 6.1 Conclusion..... 111

 6.2 Outlook..... 113

Acknowledgements 114
