Contents

Abstract	6
Zuzammenfassung	7
1 Introduction	12
1.1 Introduction and Motivation	12
1.2 Description of this thesis	14
1.3 Contribution	15
2 Structural plasticity in the brain	17
2.1 The brain as a multiscale system	17
2.2 Basic concepts about the structure and function of biological neural networks . .	18
2.3 Structural plasticity	20
2.3.1 A model of structural plasticity	22
2.3.2 Essential features of structural plasticity	26
2.4 Simulation of neural networks	27
2.5 Summary	28
3 Introduction to optimization algorithms and machine learning	29
3.1 Algorithmic optimization	29
3.1.1 Hyperparameter optimization	35
3.2 Structural plasticity, optimization and control	35
3.2.1 General form of network dynamics	37
3.2.2 Control for network state trajectories	38
3.2.3 Structural plasticity as an optimization algorithm	41
3.3 Summary	41

4 Implementation and usage of a structural plasticity algorithm in NEST	43
4.1 Implementation of a structural plasticity model in NEST 2.10	43
4.1.1 Scalability	51
4.1.2 Performance on the use cases	53
4.1.3 Static visualization of simulation results	61
4.1.4 Taking into account distance dependency in simulations	65
4.1.5 Changes in the implementation of structural plasticity for the 5th generation kernel of NEST	66
4.2 Discussion	67
5 Steering and interactive visualization of structural plasticity	74
5.1 Exploration of the parameter space of neural network connectivity	75
5.2 Connectivity generation in neural networks	77
5.3 In situ visualization and steering of connectivity generation	81
5.3.1 Simulation instrumentation	82
5.3.2 ISV system overview	83
5.4 Application of the ISV framework on use cases	85
5.4.1 Two population model	86
5.4.2 Whole brain simulation	91
5.4.3 Usage of the tool	97
5.4.4 Implementing further use cases	98
5.4.5 Simulating on a supercomputer	99
5.5 Discussion	101
6 Clinical applications	106
6.1 Introduction to structural plasticity in clinical applications	107
6.2 Implementation of the STN-GPe neural network with STDP and structural plasticity	108
6.2.1 The Network Model	108
6.2.2 Network and connectivity models	109
6.2.3 The Terman-Rubin Neuron Model	110
6.2.4 Noise inputs	111
6.2.5 Spike-Timing-Dependent Plasticity	113
6.2.6 Structural Plasticity	113

6.2.7	External Coordinated Reset stimulation	115
6.2.8	Using the model to investigate the role of structural plasticity in CRT	116
6.2.9	Parameter exploration and tuning	121
6.3	Discussion	125
7	Structural plasticity as a connectivity optimization algorithm	129
7.1	Definition of the structural plasticity model	129
7.2	Adaptive optimization of structural plasticity in spiking neural networks	131
7.2.1	Simple network with two populations	133
7.2.2	Cortical microcircuit	136
7.3	Future work	138
7.4	Discussion	138
8	Conclusions, future work and discussion	140
8.1	Conclusions and discussion	140
