Content

Summary	III
Zusammenfassung	IV
Abbreviations	VI
1 Introduction	1
1.1 Sugar consumption and sweeteners.....	1
1.1.1 Health problems caused by sugar consumption.....	1
1.1.2 Sweeteners on the market.....	1
1.2 5-Ketofructose as new natural sweetener.....	5
1.2.1 Characteristics of the potential sweetener 5-KF.....	5
1.2.2 5-KF synthesis.....	5
1.2.3 5-KF degradation.....	7
1.2.4 Chemical structures of 5-KF.....	7
1.2.5 Membrane-bound fructose dehydrogenase and its application in 5-KF production	8
1.3 <i>Gluconobacter oxydans</i>	10
1.3.1 Membrane bound dehydrogenases in <i>G. oxydans</i>	11
1.3.2 The respiratory chain of <i>G. oxydans</i>	12
1.3.3 Carbon metabolism in <i>G. oxydans</i>	13
1.3.4 <i>G. oxydans</i> IK003.1.....	14
1.4 <i>Pseudomonas putida</i>	14
1.4.1 Membrane bound dehydrogenases in <i>P. putida</i>	15
1.4.2 The respiratory chain of <i>P. putida</i>	16
1.4.3 Carbon metabolism in <i>P. putida</i>	17
1.4.4 Heterologous sucrose metabolism in <i>P. putida</i>	18
1.5 Aims of this thesis.....	19
2 Results	20
2.1 Novel plasmid-free <i>Gluconobacter oxydans</i> strains for production of the natural sweetener 5-ketofructose.....	21
2.2 Metabolic engineering of <i>Pseudomonas putida</i> for production of the natural sweetener 5-ketofructose from fructose and sucrose by periplasmic oxidation with a heterologous fructose dehydrogenase.....	47
3 Discussion	67
3.1 Development of plasmid-free <i>G. oxydans</i> strains for 5-KF production.....	67
3.1.1 Integration site-specific differences in <i>fdhSCL</i> expression.....	67
3.1.1 Influence of the <i>fdhSCL</i> copy number on expression and 5-KF production.....	67
3.1.2 Limitations in 5-KF production.....	68

3.1.3	Alternative 5-KF production via native <i>Gluconobacter</i> strains.....	69
3.2	<i>P. putida</i> as alternative 5-KF production host.....	70
3.2.1	<i>P. putida</i> at increased osmotic pressure.....	70
3.2.2	Influence of a second chromosomal <i>fdhSCL</i> copy on 5-KF production in <i>P. putida</i>	71
3.2.3	Acidification during cultivation of <i>P. putida::fdhSCL</i> with fructose or sucrose.....	71
3.2.4	Fructose uptake and metabolism in <i>P. putida</i>	73
3.2.5	Sucrose as alternative substrate for 5-KF production in <i>P. putida</i>	74
3.3	Comparison of <i>G. oxydans</i> and <i>P. putida</i> regarding their qualification for 5-KF production.....	76
3.3.1	Comparison of osmotolerance.....	76
3.3.2	Comparison of the respiratory chain and oxidation capacity.....	77
3.3.3	Comparison of acid tolerance.....	78
3.4	Conclusion and outlook.....	79
4	References.....	81
5	Appendix.....	93
5.1	Supplementary figures.....	93
5.2	Studies on cell surface display in <i>G. oxydans</i>	99
5.2.1	Background.....	99
5.2.2	Amylases.....	99
5.2.3	Membrane anchors.....	100
5.2.4	Cloning and testing.....	101
5.2.5	Conclusion.....	102
5.3	Influence of 5-KF on the <i>P. putida</i> KT2440 transcriptome.....	104
5.3.1	Background and experimental settings.....	104
5.3.2	Results.....	104
5.3.3	Genes involved in respiration and energy metabolism.....	110
5.3.4	Genes involved in metabolism.....	111
5.3.5	Genes involved in transport.....	111
5.3.6	Genes involved in motility.....	112
5.3.7	Genes involved in stress response.....	112
5.3.8	5-KF reductases.....	112
5.3.9	Conclusions.....	113
5.4	References Appendix.....	114
	Danksagung.....	117
	Erklärung.....	118
