## Table of contents

---

<b>1 Summary</b> .....	<b>1</b>
<b>2 Scientific context and key results of this thesis</b> .....	<b>2</b>
<b>2.1 Bacteriophages</b> .....	<b>2</b>
2.1.1 Bacteriophages and phage lifestyles .....	2
2.1.2 Protein-based antiphage defense strategies .....	5
<b>2.2 Chemical defense against phage infection in <i>Streptomyces</i></b> .....	<b>9</b>
2.2.1 Secondary metabolism in bacteria .....	10
2.2.2 <i>Streptomyces</i> , a gifted secondary metabolite producer .....	11
2.2.3 Phages of <i>Streptomyces</i> .....	14
2.2.4 Phage-induced natural product synthesis in <i>Streptomyces</i> .....	20
2.2.5 Aminoglycosides, antibacterial but also antiviral molecules .....	27
2.2.6 Antiphage defense at the community level mediated by small molecules .....	37
<b>2.3 Conclusions and future perspectives</b> .....	<b>40</b>
<b>2.4 References</b> .....	<b>41</b>
<b>3 Publications and manuscripts</b> .....	<b>52</b>
3.1 Genome Sequence and Characterization of Five Bacteriophages Infecting <i>Streptomyces coelicolor</i> and <i>Streptomyces venezuelae</i> : Alderaan, Coruscant, Dagobah, Endor1 and Endor2 .....	53
3.2 Aminoglycoside antibiotics inhibit phage infection by blocking an early step of the phage infection cycle .....	69
3.3 Antiphage molecules produced by bacteria – beyond protein-mediated defenses .....	86
3.4 Phage-triggered synthesis of actinorhodin and undecylprodigiosin in <i>Streptomyces coelicolor</i> .....	113
<b>4 Appendix</b> .....	<b>131</b>
4.1 Supplementary Information to “2.2.4 Phage-induced natural product synthesis in <i>Streptomyces</i> ” .....	131
4.2 Supplementary information to “Genome Sequence and Characterization of Five Bacteriophages Infecting <i>Streptomyces coelicolor</i> and <i>Streptomyces venezuelae</i> : Alderaan, Coruscant, Dagobah, Endor1 and Endor2” .....	145
4.3 Supplementary information to “Aminoglycoside antibiotics inhibit phage infection by blocking an early step of the phage infection cycle” .....	150
4.4 Supplementary information to “Antiphage molecules produced by bacteria – beyond protein-mediated defenses” .....	172
4.5 Supplementary information to “Phage-triggered synthesis of actinorhodin and undecylprodigiosin in <i>Streptomyces coelicolor</i> ” .....	183
<b>5 Acknowledgments</b> .....	<b>192</b>
