Contents

Abstract.....	v
List of Symbols and Abbreviations	vii
Chapter 1 Introduction	1
1.1 Background.....	3
1.2 Interactions between groundwater and other compartments in the water cycle	4
1.3 Three common alternative methodologies for estimating groundwater anomalies	5
1.4 Application of machine learning in groundwater resource modeling	7
1.5 Objective and outline	8
1.6 Software tools and supercomputing environment.....	10
Chapter 2 Using Long Short-Term Memory networks to connect water table depth anomalies to precipitation anomalies over Europe.....	11
Abstract.....	13
2.1 Introduction	15
2.2 Methodology.....	17
2.2.1 Conceptual model of groundwater balance.....	17
2.2.2 Long Short-Term Memory networks.....	18
2.2.3 Continuous and cross-wavelet transform	20
2.2.4 Study area and data set	21
2.2.5 Experiment design	23
2.3 Results and discussion	26
2.3.1 Water table depth anomaly maps in 2003 and 2015 reproduced by the LSTM network results	26
2.3.2 Impact of local factors on the network performance.....	27
2.3.3 Cross-wavelet transform (XWT) analysis	31
2.4 Summary and conclusions.....	33
Chapter 3 An indirect approach based on Long Short-Term Memory networks to estimate groundwater table depth anomalies across Europe with an application for drought analysis	35
Abstract.....	37

3.1	Introduction	39
3.2	Methodology.....	41
3.2.1	Long Short-Term Memory networks.....	41
3.2.2	Wavelet coherence analysis.....	43
3.2.3	Study area and data set	44
3.2.4	Experimental design	46
3.3	Results	51
3.3.1	Test performance of the LSTM networks in the different experiments.....	51
3.3.2	European water table depth anomaly map in 2015 reproduced by the results of the optimal LSTM networks	52
3.3.3	Wavelet coherence analysis on regionally averaged water table depth anomaly time series in ME	53
3.4	Discussion.....	54
3.5	Summary and conclusions.....	55
Chapter 4	Advancing AI-based pan-European groundwater monitoring	57
Abstract.....	59	
4.1	Introduction	61
4.2	Methods	64
4.2.1	LSTM-TL.....	64
4.2.2	Datasets.....	65
4.2.3	Evaluation metrics	66
4.3	Results	68
4.3.1	LSTM-TL performance	68
4.3.2	Recent groundwater drought analysis using reconstructed pan-European long-term water table depth anomaly data.....	69
4.3.3	Seasonal trends of water table depth anomalies in various European regions	71
4.4	Discussion.....	72
Chapter 5	Conclusions and outlook.....	75
5.1	Summary and conclusions.....	77
5.2	Limitations	79
5.3	Outlook.....	80
5.4	Code and data availability.....	81
Appendix.....	.83	
Appendix A	Supplementary material to Chapter 2.....	85
Appendix B	Supplementary material to Chapter 3.....	89

Appendix C Supplementary material to Chapter 4.....	95
List of Figures	105
List of Tables.....	109
Bibliography.....	111
Acknowledgements.....	125
