Contents

Declaration of independent work.....	I
Acknowledgements.....	III
Abstract.....	V
Zusammenfassung.....	IX
Contents	XIII
List of figures.....	XVII
List of tables.....	XXIII
List of abbreviations.....	XXV
Chapter 1. Introduction.....	1
1.1 General motivation.....	1
1.2 Biochar.....	2
1.2.1 What is biochar?	2
1.2.2 Applications of biochar	3
1.2.3 Limitations and potential solutions.....	5
1.3 Spectra induced polarization (SIP)	6
1.3.1 Development of the induced polarization method.....	6
1.3.2 SIP for biochar investigations	8
1.4 Aims and structure of this thesis	8
Chapter 2. Theory and models of spectral induced polarization.....	11
2.1 Introduction.....	11
2.2 The basics of SIP measurements.....	11
2.3 The electrical double layer and sources of induced polarization	14
2.3.1 Electrical double layer (EDL).....	14
2.3.2 Sources of induced polarization.....	15

2.4 Models of induced polarization	20
2.4.1 Empirical and semi-empirical models - equivalent circuit approaches	21
2.4.2 Relaxation time distribution methods	25
2.4.3 Poisson-Nernst-Planck (PNP) theory for perfectly conductive particles	26
2.4.4 The Wong model for perfectly conductive particles	26
2.4.5 The Revil model for semi-conductive particles	33
2.4.6 Other models for conductive/semi-conductive materials	34
2.4.7 Models for porous media with non-conductive particles.....	35
2.4.8 Induced polarization of pore space and membrane polarization	41
2.4.9 Discrimination between models for conductive and nonconductive materials.....	43
Chapter 3. Materials and methods	45
3.1 Introduction.....	45
3.2 Materials	45
3.2.1 Properties of selected biochars.....	45
3.2.2 Sand and electrolyte.....	47
3.2.3 Pre-treatments before sample preparation	47
3.3 SIP measurement setup	48
3.3.1 Electrical impedance spectrometer	48
3.3.2 Sample holder for SIP measurements on saturated samples.....	50
3.3.3 Sample holder for SIP measurements during drainage.....	51
3.3.4 Sample holder for SIP measurements during evaporative drying.....	53
3.4 SIP data acquisition and interpretation	53
3.4.1 SIP data acquisition.....	53
3.4.2 Debye decomposition.....	54
Chapter 4. SIP measurements on saturated sand-biochar mixtures.....	57

4.1 Introduction.....	57
4.2 Materials and methods	57
4.2.1 Sample preparation	57
4.2.2 SIP data acquisition and interpretation	59
4.3 Results of measured complex electrical conductivity and Debye decomposition.....	60
4.3.1 Dependence on type of biochar.....	60
4.3.2 Dependence on mass fraction of biochar	61
4.3.3 The dependence on particle size of biochar	63
4.3.4 Dependence on electrolyte concentration	65
4.4 Discussion.....	69
4.5 Conclusions.....	74
Chapter 5. Modeling the spectral induced polarization data of saturated sand-biochar mixtures	75
5.1 Introduction.....	75
5.2 Considerations about the polarization of biochar	76
5.3 Data and methods.....	80
5.3.1 Properties of investigated biochar.....	80
5.3.2 SIP data and properties of samples	81
5.3.3 Estimation of parameters for the Wong model and Revil model	82
5.4 Results and Discussion	87
5.4.1 Measured complex electrical conductivity of sand-biochar mixtures	87
5.4.2 Model fitting results and analysis for the Revil model	92
5.4.3 Model fitting results and analysis for the Wong model	95
5.5 Summary and outlook	100
Chapter 6. Spectral induced polarization on unsaturated sand-biochar mixture....	103
6.1 Introduction.....	103
6.2 Materials and methods	104

6.3 MSO drainage	104
6.3.1 Sample preparation and drainage experiment.....	104
6.3.2 Sample drainage and SIP measurement.....	106
6.3.3 Data interpretation	108
6.3.4 Results and discussion of water retention of sand-biochar mixtures	108
6.3.5 Results and discussion of SIP measurements during pressure drainage	
.....	112
6.4 Evaporation.....	123
6.4.1 Sample preparation	123
6.4.2 SIP measurements and saturation determination	125
6.4.3 Effect of evaporation on real part of the complex conductivity	126
6.4.4 Effect of evaporation on imaginary part of the complex conductivity	
.....	129
6.5 Conclusions.....	132
7. Conclusions and outlook.....	133
7.1 Conclusions.....	133
7.2 Outlook	137
References.....	143
