Contents

Acknowledgments.....	I
Abstract.....	III
Chapter 1 Background and Motivation.....	1
1.1 Background	1
1.2 Motivation and Tasks	8
Chapter 2 Campaign and Instruments.....	9
2.1 JULIAC campaign	9
2.1.1 Campaign location and characteristics	9
2.1.2 Campaign setup	10
2.2 Atmospheric simulation chamber SAPHIR	14
2.3 HR-ToF-AMS	15
2.3.1 HR-ToF-AMS introduction	15
2.3.2 HR-ToF-AMS maintenance and data treatment	17
2.3.2.1 HR-ToF-AMS operation data	17
2.3.2.2 Flowrate calibration	20
2.3.2.3 Ion efficiency calibration	21
2.3.2.4 RIE correction	22
2.3.2.5 AMS collection efficiency	24
2.4 SMPS and CPC	25
2.5 Supporting measurements and instrumentations.....	25
Chapter 3 Methodologies.....	27
3.1 Positive matrix factorization/PMF	27
3.1.1 PMF mechanism	27
3.1.2 Unconstrained and constrained PMF.....	28
3.1.3 Nitrate added PMF analysis.....	33
3.2 Aerosol components and elemental ratio calculation.....	34

3.2.1 Aerosol organic nitrate estimation.....	34
3.2.2 Aerosol methanesulfonic acid estimation.....	36
3.2.3 Elemental ratio of organic compounds.....	37
3.3 Meteorological and modeling analysis.....	37
3.3.1 Back trajectory analysis.....	37
3.3.2 Polar analysis.....	38
3.3.3 Atmospheric layer estimation and effect.....	38
3.3.4 ISORROPIA simulation.....	41
3.4 Chemical kinetics calculation.....	42
3.4.1 NO ₃ radical estimation.....	42
3.4.2 Branching ratio.....	42
Chapter 4 Results and Discussion.....	45
4.1 Aerosol chemical composition overview.....	45
4.2 Seasonal OA source apportionment overview.....	55
4.2.1 Primary sources.....	58
4.2.1.1 Hydrocarbon-like organic aerosol, HOA.....	58
4.2.1.2 Biomass burning emission, BBOA.....	61
4.2.2 Secondary sources.....	67
4.2.3 Regional transport.....	70
4.3 Marine source factor: Methanesulfonic acid-containing organic aerosol/MSA-OA factor.....	76
4.4 Nocturnal oxidation oxygenated organic aerosol/NO-OOA factor.....	84
4.4.1 Nocturnal aerosol oxidation.....	84
4.4.2 NO ₃ radical as dominant oxidant of nocturnal OA oxidation.....	89
4.4.3 Seasonal dominant precursors for NO ₃ -initiated dark oxidation.....	94
4.4.3.1 Biomass burning VOCs.....	94
4.4.3.2 Biogenic VOCs.....	102
4.4.4 Perspectives.....	107

4.4.5 Conclusion	109
4.5 Seasonal comparisons of OA	110
4.5.1 The oxidation degree of OA	110
4.5.2 Seasonal variations of source contributions	113
4.5.3 Seasonal variations of source properties	117
4.5.3.1 Seasonal variations of OA factors spectrum.....	117
4.5.3.2 Seasonal variations of oxidation degree of OA factors	119
Chapter 5 Summary and Outlook	123
Appendix A	127
A. 1 Aerosol transmission loss of the JULIAC inlet system.....	127
A. 2 Aerosol wall loss of the SAPHIR chamber	129
A. 3 Diagnostic and calibration parameters of AMS	131
A. 4 Aerosol composition overview during the JULIAC	133
A. 5 MSA-OA supplement.....	134
A. 6 Ions list for AMS HR analysis	134
A. 7 Source factors supplement of organic PMF analysis	141
A. 8 Regional transport factor supplement	145
A. 9 Temperature dependent rate constant.....	146
A. 10 Gas tracers and meteorological condition overview	147
A. 11 Source factors overview of NO ₃ +Organics PMF analysis	148
A. 12 Instruments and available data for the JULIAC campaign	152
A. 13 Map of wildfire counts	159
A. 14 NB-OOA diurnal variation supplement	160
List of Figures and Tables.....	161
List of Figures	161
List of Tables.....	171
Abbreviation	173

References.....	175
