Development of Glass-based Sealants for the Joining of Oxygen Transport Membranes

Xinfang Li

Schriften des Forschungszentrums Jülich
Reihe Energie & Umwelt / Energy & Environment

Band / Volume 600

ISSN 1866-1793

ISBN 978-3-95806-677-9

Content

1. Motivation and objective.....	1
2. Background	4
2.1 Oxygen transport membranes (OTMs).....	4
2.1.1 Mechanism and application of OTMs.....	4
2.1.2 Membrane materials.....	6
2.1.3 Membrane module design.....	7
2.2 High-temperature joining methods for OTM	9
2.2.1. Sealant requirements for OTM application.....	10
2.2.2 Brazing	10
2.2.3 Glass-based sealants joining	12
2.2.3.1 State-of-the-art glass-based sealants	17
3. Experimental	25
3.1 Glass powder preparation	25
3.1.1 Ba-Ca glass H	25
3.1.2 Ba-Sr system glasses BS	26
3.2 Filler materials.....	27
3.3 Chemical compatibility of filler materials with glass H matrix	30
3.4 Thermal analysis.....	30
3.5 Crystallization analysis.....	30
3.5.1 X-ray diffraction	30
3.5.2 FactSage simulation	31
3.6 Dilatometric measurement.....	31
3.7 Sinking dilatometer.....	32
3.8 Hot stage microscopy (HSM) for investigating viscous behavior.....	33
3.9 Glass-based sealant green foil preparation for joining application	34
3.9.1 Robot syringe dispenser	35
3.9.2 Screen printing	35
3.10 Joining tests and analyses	37
3.11 Mechanical test	38

3.12 Thermal cycling.....	40
3.13 Long-term thermal stability	40
3.14 Fast joining process investigation.....	41
3.15 Other glass-based sealants joining process.....	43
4. Results and discussion.....	44
4.1 Glass matrix H: investigation of thermal properties and crystallization	44
4.1.1 General effects of glass crystallization on the joining behavior	44
4.1.2 Thermal analysis and thermal stability calculation.....	45
4.1.3 Thermal expansion behavior of glass H.....	46
4.1.4 Crystallization behavior of glass H.....	47
4.1.5 Summary of studies on glass matrix H	52
4.2 Metal fillers and several membrane powders reinforced glass composite sealants	53
4.2.1 Fundamental idea of analyzed composite mixtures	53
4.2.2 Chemical compatibility.....	54
4.2.3 Thermal expansion.....	60
4.2.4 Shrinkage behavior of metal filler reinforced sealants	65
4.2.5 Joining behavior of metal filler reinforced sealants joining at 850 °C	66
4.2.5.1 Gas tightness	66
4.2.5.2 Microstructure of assembled joints	67
4.2.6 Mechanical strength measurement of metal filler reinforced sealants.....	70
4.2.7 Thermal cycling study on metal filler reinforced sealants.....	73
4.2.8 Long term stability of metal filler reinforced sealants	77
4.2.9 Summary	79
4.3. Fast joining process investigation.....	81
4.3.1 Motivation.....	81
4.3.2 Shrinkage and viscous behavior investigation on metal reinforced glass composites...82	
4.3.3 Effect of fast sintering processes on sealant gas tightness.....	84
4.3.4 Internal structure analysis by X-ray computed tomography.....	85
4.3.5 Microstructure analysis for fast joining samples	86
4.3.5.1 HNC30	86

4.3.5.2 HAg40	89
4.3.6 Summary	90
4.4 Ceramic BaSiO ₃ reinforced glass composite sealants	91
4.4.1 General remark.....	91
4.4.2 XRD analysis for BaSiO ₃	92
4.4.3 Investigate BaSiO ₃ filler amount on thermal expansion coefficients of glass composites	92
4.4.4 Viscous flow behavior of BaSiO ₃ reinforced sealant.....	94
4.4.5 Gas tightness test of BaSiO ₃ reinforced sealant.....	95
4.4.6 Internal structure analysis of STF25/HBS30/Aluchrom joints by X-ray computed tomography	96
4.4.7 Microstructural analysis of joining behavior	97
4.4.8 Summary	102
4.5 Ceramic Sr ₂ SiO ₄ reinforced glass composite sealants.....	103
4.5.1 General remark.....	103
4.5.2 XRD analysis for Sr ₂ SiO ₄	103
4.5.3 The effect of Sr ₂ SiO ₄ filler amount on thermal expansion behavior and microstructure of glass-based sealant.....	104
4.5.4 Shrinkage and viscous behavior investigation on Sr ₂ SiO ₄ glass sealant	107
4.5.5 Joining behavior of Sr ₂ SiO ₄ reinforced glass composite sealant	109
4.5.5.1 Gas tightness	109
4.5.5.2 Microstructure of assembled joints	110
4.5.6 Summary	113
4.6 New Ba-Sr-Si-B glass sealant development	114
4.6.1 Principle idea of new glass development.....	114
4.6.2 Glass forming tendency evaluation.....	115
4.6.3 Thermal expansion behavior of BS glasses	117
4.6.4 Crystallization analysis of BS glasses.....	120
4.6.5 Joinability investigation of BS glasses	123
4.6.5.1 Shrinkage behavior of BS glasses analysis by sinking dilatometer	123
4.6.5.2 Viscous flow behaviors of BS glasses.....	124

4.6.5.3 Helium leakage test for the joint	126
4.6.5.4 Assembling test with membrane STF25	130
4.6.6 Summary	132
5. Conclusions	133
6. Outlook.....	135
7. References	136
List of abbreviations and symbols.....	148
Index of Figures	150
Index of Tables.....	155
Acknowledgments	157
Publications and conference contribution	159
