# Contents

|   |      |
|---|------|
| Acknowledgments .....   | I    |
| Abstract .....  | II   |
| Zusammenfassung.....  | IV   |
| Contents .....  | VI   |
| List of figures .....   | X    |
| List of tables .....  | XIII |
| List of abbreviations .....   | XIV  |
| 1. Introduction.....  | 1    |
| 1.1 Background.....   | 2    |
| 1.2 Rationale.....  | 3    |
| 1.2.1 N cycle .....   | 3    |
| 1.2.2 N fertilizers .....   | 5    |
| 1.2.3 The challenges of N loss and mitigation strategies .....  | 7    |
| 1.3 State of the art .....  | 12   |
| 1.3.1 Straw.....  | 12   |
| 1.3.2 Sawdust .....   | 13   |
| 1.3.3 Lignite .....   | 14   |
| 1.3.4 Biochar.....  | 15   |
| 1.4 Research objectives.....  | 16   |
| 2. High carbon amendments increase nitrogen retention in soil after slurry application – an incubation study with silty loam soil ..... | 19   |
| 2.1 Introduction.....   | 20   |
| 2.2 Materials and methods .....   | 21   |
| 2.2.1 Soil .....  | 21   |
| 2.2.2 Slurries.....   | 21   |
| 2.2.3 HCA .....   | 21   |
| 2.2.4 Incubations.....  | 21   |
| 2.2.5 Gas analysis .....  | 24   |
| 2.2.6 Nutrient analysis.....  | 24   |
| 2.2.7 Microbial biomass .....   | 24   |
| 2.2.8 $^{15}\text{N}$ analysis .....  | 24   |
| 2.2.9 Calculations and statistical analysis.....  | 25   |
| 2.3 Results .....   | 25   |
| 2.3.1 pH .....  | 25   |

|  |           |
|--|-----------|
| 2.3.2 CO <sub>2</sub> .....  | 27        |
| 2.3.3 N <sub>2</sub> O .....   | 29        |
| 2.3.4 NH <sub>3</sub> .....  | 29        |
| 2.3.5 DOC and microbial biomass.....   | 30        |
| 2.3.6 Mineral N in soil.....   | 32        |
| 2.3.7 <sup>15</sup> N recovery in soil .....   | 32        |
| 2.3.8 Mineral N and δ <sup>15</sup> N in soil solution .....   | 33        |
| 2.4 Discussion .....   | 35        |
| 2.5 Conclusion .....   | 39        |
| <b>3. Fenton oxidation of biochar improves retention of cattle slurry nitrogen .....</b>   | <b>41</b> |
| 3.1 Introduction.....  | 42        |
| 3.2 Materials and methods .....  | 43        |
| 3.2.1 Biochar production.....  | 43        |
| 3.2.2 Biochar oxidation.....   | 43        |
| 3.2.3 Characterization of carbonaceous materials.....  | 44        |
| 3.2.4 Determination of NH <sub>4</sub> <sup>+</sup> retention and release.....   | 44        |
| 3.2.5 Measurement of NH <sub>3</sub> emission .....  | 44        |
| 3.2.6 Calculations and statistical analysis.....   | 45        |
| 3.3 Results .....  | 45        |
| 3.3.1 Physicochemical properties of carbonaceous materials.....  | 45        |
| 3.3.2 NH <sub>4</sub> <sup>+</sup> retention and release.....  | 46        |
| 3.3.3 Reduction of NH <sub>3</sub> emission.....   | 47        |
| 3.4. Discussion .....  | 48        |
| 3.4.1 Effect of Fenton oxidation of biochar on NH <sub>4</sub> <sup>+</sup> retention and release .....                              | 48        |
| 3.4.2 Effect of Fenton oxidation on the reduction of NH <sub>3</sub> emission .....  | 49        |
| 3.5. Conclusions.....  | 50        |
| <b>4. Improving nitrogen retention of cattle slurry with oxidized biochar – an incubation study with three different soils .....</b> | <b>53</b> |
| 4.1 Introduction.....  | 54        |
| 4.2 Materials and methods .....  | 55        |
| 4.2.1 Soil and cattle slurry .....   | 55        |
| 4.2.2 Production and oxidization of biochar .....  | 55        |
| 4.2.3 Experimental design and incubation.....  | 56        |
| 4.2.4 Analysis of GHG and NH <sub>3</sub> .....  | 56        |
| 4.2.5 Analysis of DOC and mineral N in soil and microbial biomass .....  | 57        |
| 4.2.6 <sup>15</sup> N isotope analysis .....   | 57        |

|  |    |
|--|----|
| 4.2.7 Calculation and statistical analysis .....   | 57 |
| 4.3 Results .....  | 58 |
| 4.3.1 GHG and NH <sub>3</sub> emissions .....  | 58 |
| 4.3.2 Soil properties after 86 days of incubation .....  | 59 |
| 4.3.3 Mineral N and slurry- <sup>15</sup> N in the soil solution .....   | 63 |
| 4.3.4 <sup>15</sup> N recovery in soil .....   | 65 |
| 4.4. Discussion .....  | 65 |
| 4.4.1 Effect of soil type on N retention .....   | 65 |
| 4.4.2 Effect of (oxidized) biochar on soil pH, DOC and microbial biomass .....   | 66 |
| 4.4.3 Effect of (oxidized) biochar on N retention .....  | 66 |
| 4.5 Conclusions .....  | 68 |
| 5. Optimized use of cattle slurry nitrogen in agriculture by co-application of high carbon<br>amendments: An outdoor lysimeter study with <sup>15</sup> N-labeled slurry ..... | 69 |
| 5.1 Introduction .....   | 70 |
| 5.2 Materials and methods .....  | 71 |
| 5.2.1 Soil, HCA, cattle slurry and experimental setup .....  | 71 |
| 5.2.2 Gas analysis .....   | 72 |
| 5.2.3 Leachate analysis .....  | 72 |
| 5.2.4 Soil analysis .....  | 73 |
| 5.2.5 Plant analysis .....   | 73 |
| 5.2.6 Calculation and statistical analysis .....   | 73 |
| 5.3. Results .....   | 74 |
| 5.3.1 GHG and NH <sub>3</sub> cumulative emissions .....   | 74 |
| 5.3.2 DOC and mineral N in leachate .....  | 75 |
| 5.3.3 Soil DOC and mineral N contents .....  | 76 |
| 5.3.4 Yields and TN content of wheat and barley .....  | 77 |
| 5.3.5 <sup>15</sup> N recovery .....   | 78 |
| 5.4. Discussion .....  | 79 |
| 5.4.1 Effects of HCA on GHG and NH <sub>3</sub> emission .....   | 79 |
| 5.4.2 Effects of HCAs on crop yields and <sup>15</sup> N recovery .....  | 81 |
| 5.4.3 Effects of HCAs on soil properties and leachate .....  | 81 |
| 5.5 Conclusions .....  | 82 |
| 6. Synopsis .....  | 83 |
| 6.1 Summary .....  | 84 |
| 6.2 Synthesis .....  | 85 |
| 6.2.1 Identification of the optimal HCA .....  | 86 |

|   |     |
|---|-----|
| 6.2.2 The sustainable alternative .....                 | 87  |
| 6.2.3 Other factors that affect N loss from soils ..... | 88  |
| 6.3 Conclusions and outlook .....                       | 89  |
| Appendix.....   | 91  |
| Appendix A: supplemental material for chapter 2.....    | 92  |
| Appendix B: supplemental material for chapter 3 .....   | 95  |
| Appendix C: supplemental material for chapter 4 .....   | 96  |
| Appendix D: supplemental material for chapter 5.....    | 97  |
| References.....   | 101 |
