# Contents

<b>1. Introduction</b>	<b>1</b>
<b>2. Density Functional Theory</b>	<b>6</b>
2.1. The Many-body Schrödinger Equation	6
2.2. Born-Oppenheimer Approximation	7
2.3. Hohenberg-Kohn Theorems	7
2.4. Kohn-Sham Formulation	8
2.5. Spin polarized DFT	9
2.6. Exchange and Correlation functionals	10
2.6.1. Local spin density approximation (LSDA)	10
2.6.2. Generalized gradient approximation (GGA)	11
2.6.3. Hubbard $U$ correction	11
2.7. Plane waves and Pseudopotentials	12
2.8. Spin-orbit coupling	14
2.9. The hyperfine interaction	14
2.10. Quantum ESPRESSO	15
<b>3. Theory of the hyperfine interactions</b>	<b>17</b>
3.1. Dirac Equation	17
3.2. Hyperfine interaction	19
3.2.1. Fermi contact interaction	19
3.2.2. Dipolar hyperfine interaction	21
3.2.3. Nuclear-orbital interactions	21
3.2.4. Hyperfine Interaction Parameters	22
3.3. Spin-orbit interaction	23
<b>4. Hyperfine fields of magnetic adatoms on ultrathin insulating films</b>	<b>24</b>
4.1. Introduction	24
4.2. Computational details	25
4.3. Reference atomic calculations	27
4.4. Adatoms on 1–3 layers of MgO	29
4.5. Adatoms on 1–2 layers of NaCl and NaF	35
4.6. Adatoms on 1 layer of Cu <sub>2</sub> N and h-BN	37
4.7. Discussion of the limitations of our simulations	40
4.8. Conclusion	40

<b>5. Hyperfine fields of Iron dimers</b>	<b>44</b>
5.1. Introduction . . . . .	44
5.2. Computational details . . . . .	45
5.3. Free-standing Fe dimers . . . . .	47
5.4. Recap: Hyperfine interaction of a single Fe adatom on bilayer of MgO .	52
5.5. Hyperfine interaction of Fe dimers on a bilayer of MgO . . . . .	52
5.6. Conclusion . . . . .	57
<b>6. Magnetic Anisotropy Energy of 3d adatoms and 3d-O molecules on the bilayer of MgO</b>	<b>58</b>
6.1. Introduction . . . . .	58
6.2. Computational details . . . . .	60
6.3. MAE of a single Co adatom on the bilayer of MgO . . . . .	61
6.4. Magnetic Anisotropy Energy of 3d adatoms and 3d-O molecules on the bilayer of MgO . . . . .	65
6.5. Hyperfine interactions . . . . .	70
6.6. Conclusion . . . . .	72
<b>7. Conclusions</b>	<b>74</b>
<b>A. Appendix-chapter 4</b>	<b>79</b>
<b>B. Appendix-chapter 5</b>	<b>84</b>
<b>C. Appendix-chapter 6</b>	<b>90</b>
<b>D. Induced magnetization from multiple-scattering expansion</b>	<b>99</b>
<b>E. List of scientific contributions</b>	<b>101</b>
