Contents

Acknowledgments.....	I
Abstract.....	II
Zusammenfassung.....	III
List of Tables.....	V
List of Figures.....	VII
List of Abbreviations.....	X
Chapter 1.....	1
1.1 Background.....	2
1.2 Rationale and state of the art.....	3
1.2.1 Biological process of N ₂ O losses.....	3
1.2.2 The main controls of N ₂ O emission.....	5
1.2.3 Direct and indirect effects of organic soil amendments on soil N retention and N losses.....	7
1.2.4 Effect of organic soil amendments on crop yield.....	9
1.2.5 N in the soil after crop harvest.....	10
1.2.6 Lysimeter-an advanced tool for the measurement of N cycling.....	10
1.3 Objectives and outline of the thesis.....	11
Chapter 2.....	13
2.1 Introduction.....	14
2.2 Materials and methods.....	15
2.2.1 Data sources.....	15
2.2.2 Data analysis.....	16
2.3 Results.....	18
2.4 Discussion.....	23
2.4.1 Climatic conditions.....	23
2.4.2 Land use type.....	24
2.4.3 Soil pH.....	24
2.4.4 Soil texture.....	25
2.4.5 Synthetic fertilizer application.....	26
2.4.6 Crop residue type.....	27
2.4.7 Tillage.....	28
2.4.8 Duration of the experiments.....	29

2.4.9 Overall effects of residue return on N losses	29
2.4.10 Potential publication bias	30
2.5 Conclusion	30
Chapter 3	31
3.1 Introduction	32
3.2 Materials and methods	34
3.2.1 Soils and organic amendments	34
3.2.2 Experimental design	35
3.2.3 Greenhouse gas measurements	35
3.2.4 Soil extraction and analysis.....	36
3.2.5 Statistical analysis	36
3.3 Results.....	37
3.3.1 CO ₂ emission	37
3.3.2 N ₂ O emission	37
3.3.3 Extractable mineral N	38
3.3.4 Extractable P, dissolved organic C and microbial biomass C.....	40
3.4 Discussion	41
3.5 Conclusion	44
Chapter 4.....	46
4.1 Introduction	47
4.2 Materials and methods	48
4.2.1 Soil characteristics	48
4.2.2 Experimental design	49
4.2.3 GHG sampling and flux calculation.....	50
4.2.4 Soil sampling and measurement.....	50
4.2.5 Statistical analysis	51
4.3 Results.....	51
4.3.1 Effect of HCA, glucose, and P fertilizer addition on GHG emissions	51
4.3.2 Effect of HCA, glucose, and P fertilizer addition on soil nutrient status	53
4.3.3 The effect of HCA, glucose, and P fertilizer addition on soil microbial biomass	55
4.3.4 The effect of HCA, glucose, and P addition on the dynamics ¹³ C in soil microbial biomass	57
4.4 Discussion	58
4.4.1 Combined effect of HCA, glucose, and P on GHG emissions	58

4.4.2 Combined effect of HCA, glucose, and P on soil nutrients.....	60
4.4.3 Combined effect of HCA, glucose, and P on soil microbial biomass	62
4.4.4 Combined effect of HCA, glucose, and P on $\delta^{13}\text{C}$ incorporation in microbial biomass.....	63
4.5 Conclusions.....	63
Chapter 5.....	65
5.1 Introduction	66
5.2 Materials and methods	68
5.2.1 Experimental site and design.....	68
5.2.2 Measurement of GHG emissions	69
5.2.3 Soil extraction and analysis.....	70
5.2.4 Measurement of nutrient leaching.....	70
5.2.5 Determination of crop parameters	70
5.2.6 Statistical analysis	71
5.3 Results.....	71
5.3.1 Meteorological data	71
5.3.2 Soil GHG fluxes and emissions	72
5.3.3 Soil nutrient retention.....	74
5.3.4 Nutrient leaching.....	78
5.3.5 Crop production.....	79
5.4 Discussion	79
5.4.1 Effect of temperature and precipitation on GHG emissions.....	79
5.4.2 Effect of compost on GHG emissions	81
5.4.3 Effect of compost on soil nutrient retention	82
5.4.4 Effect of compost on soil nutrient leaching.....	83
5.4.5 Effect of compost on crop production	83
5.5 Conclusions.....	84
Chapter 6.....	85
6.1 Summary	86
6.2 Synthesis	88
6.3 Perspectives	91
6.3.1 Soil properties and ecosystems	92
6.3.2 Using ^{15}N to understand N fate in agroecosystems	92
6.3.3 A meta-analysis focusing on the effect of biochar on N retention.....	93
References	94
